*Quality  
Sells*

SPECIAL attention is called to new goods added to the standard line in this new PRICE-LIST of JANUARY, 1918, the merits of which are fully established with the trade and mechanics generally.

Our desire is to impress upon the Trade and all Users, that in addition to the most complete line of Saws manufactured, there is a large variety of Carpenters', Bricklayers' and other Mechanics' Tools of that same "HIGH DISSTON STANDARD"—making these TOOLS the same VALUED ASSET to the Merchants' Stock as DISSTON Saws.

HENRY DISSTON, prior to 1855, imported all the steel used by him in the manufacture of DISSTON Saws; in that year he built and operated his own CRUCIBLE STEEL PLANT, where, employing his wide knowledge of SAW requirements, he carefully investigated and experimented, until he discovered a formula which enabled him to produce the finest SAW STEEL in the WORLD. From time to time thereafter other formulas were developed and thoroughly tested for the respective needs of other TOOLS bearing the BRAND of DISSTON. This Steel Plant, the first and for a long time the only CRUCIBLE SAW STEEL Plant in the United States, has been continued by HENRY DISSTON & SONS. The improvement of efficiency and output has kept pace with the increasing requirements of SAWS, TOOLS, FILES, KNIVES, Etc.

In the quality of STEEL, therefore, lies the first of a series of reasons for the continued wonderful efficiency of the DISSTON BRAND GOODS.

The plant of HENRY DISSTON & SONS was established in 1840, and now consists of 50 acres, 64 buildings in which 3600 employees are at work, progression being strikingly shown by the up-to-date buildings, sanitary appliances and the equipment which consists of the latest improved machinery, many of which were originated and built in the Disston Works.

These remarkable facilities guarantee the HIGHEST STANDARD OF QUALITY, and EFFICIENCY of all SAWS, TOOLS, FILES, KNIVES, Etc., bearing the BRAND of DISSTON.

## NOTICE

**A**LL ORDERS from persons unknown to us must be accompanied with cash or good commercial reference, unless the goods are to be shipped C. O. D., in which case we require a deposit sufficient to cover express charges both ways, as a guaranty that the goods will be taken from the express office promptly on arrival. Shipments made by parcel post to all parts of the United States and its possessions in accordance with the rules of the Post Office Department, the amount of postage will be charged net on invoice, not subject to the cash discount.

REMITTANCES should be made by P. O. Money Order, Registered Letter, Draft on Philadelphia or New York, or by Express, which will insure safe delivery. When sent by express, the charges must be prepaid. Bills unpaid by the 20th proximo, will be drawn for at sight.

PROPER SHIPPING INSTRUCTIONS should be given, to prevent delay, expense and annoyance to customers.

ALL GOODS SHIPPED AT PURCHASER'S RISK AND INVOICED  
AT CURRENT RATES WHEN SHIPPED

PRICES are F. O. B. cars or boat Philadelphia.

QUOTATIONS subject to change without notice, correction of stenographic or typographical errors, and are contingent upon accidents, strikes and other delays unavoidable or beyond our control.

WHEN SENDING SAWS FOR REPAIRS

THE NAME OF OWNER SHOULD APPEAR ON EACH in order to identify it when received, thus avoiding delay. Mail us full instructions for the work to be done, stating the hand, speed, and feed of the mill, and shipping directions for the return of the saw.

MARK PACKAGE PLAINLY, TACONY, PHILADELPHIA, U. S. A.

DISSTON  
STANDARD  
PATTERNS

MADE IN  
VARIOUS  
SIZES

Adapted to any pattern  
of Solid Tooth Saw, par-  
ticularly circular Cut-off  
Saws. Allows for expan-  
sion and contraction of rim,  
lessening risk of breakage.

The above cut illustrates various **Styles of Teeth** for Circular Saws. By referring to this when ordering, customers will be enabled to indicate to us the style of tooth required; gauge or thickness per list below.

**SOLID TOOTH:** For Crosscutting Nos. 2, 4, 5 and 17. Ripping Nos. 11, 12, 13 and 14. Ripping or Crosscutting Nos. 1, 6 and 8. Mixing or Crosscutting No. 18.

The **CHISEL TOOTH** is the best form for general mill use. No. 10 is used principally on the Pacific Coast. No. 16 is adapted for thin saws, re-saws, etc. The **AMERICAN, TEENTON, PRUSSER, DUNBAR and GOULDING** are styles formerly made by The American Saw Co.

## "MONARCH"

Adapted for Setting Saws  
Three-Quarter Inch  
and Wider

Barff Finish

No. 2 (small)	\$8.00 per dozen	Packed one-half dozen in box
No. 12 (medium)	11.00 " "	Packed one in box
No. 20 (large)	15.00 " "	Packed one in box

Trade Mark Registered  
U.S. Patent Office

## "TRIUMPH"

Barff Finish  
Polished Head

No. 8 (large)	\$18.00 per doz.	For Circular and Cross-cut Saws, 12 Gauge and lighter. Packed one in box.
No. 18 (med.)	15.00 " "	For Circular and Cross-cut Saws, 14 Gauge and lighter. Packed one in box.
No. 28 (small)	11.00 " "	For Hand Saws, Back Saws, Web Saws, Narrow Band Saws, etc. 10 points to the inch and coarser. Packed one-half dozen in box.
No. 280 (small)	11.00 " "	For Hand Saws, Back Saws, Web Saws, Butcher Saw Blades, etc., from 10 to 16 points. Packed one-half dozen in box.

The idea embodied in this Saw-set is one that will commend itself to every user of a saw-setting tool. The principal feature is the use of two plungers operated by the two levers or handles, pressure on the lower lever forcing plunger "D" against the body of the saw, thus holding it rigidly in position and preventing slipping, whilst a continuation of the pressure on the upper lever operates plunger "C" in setting the tooth.

In action it is easy and powerful, and while it will perfectly set wide and heavy saws, it is also particularly adapted for narrow blades, such as web saws, narrow band saws, etc. If the gauge "B" is properly adjusted, the result will be a uniformity of set that cannot be obtained by any other hand set.

Another important point is that the head of the set is made open, enabling the operator to quickly adjust the Saw-set to the tooth, the work being in plain view at all times. The gauge "B" for regulating depth of set has a wider bearing than in most saw-sets, thus doing away with the tendency to incline the tool to one side or the other, which would give an uneven set to the tooth. The anvil "E" is fitted with four beveled surfaces, suitable for different sizes of teeth.

In operating, first adjust the anvil so that the bevel most suitable for the size tooth to be set is brought into position; hang the Saw-set on the saw so that the gauge "B" rests on the teeth, adjust this gauge for the depth of set to be given by the use of screw "A". Use care not to go too deeply into the body of the tooth, as all of the set should be in the point itself. Taking too deep a hold is liable to distort the body of the blade or break out the teeth. The top of plunger "C" should be on line with the top of tooth to be set.

We claim this to be the best Hand Set ever put on the market, and a trial will convince anyone of its superior merits. If the instructions as to adjustment are carried out the results will be entirely satisfactory to the operator.

# HAND-SAW JOINTER

SPECIALLY ADAPTED FOR HAND SAWS, NARROW BAND SAWS, ETC.

When the teeth of a saw become irregular in size it is absolutely necessary to dress them down until all are of an equal height, and this should always be done before attempting to reset or sharpen the saw. To facilitate this work and insure evenness we fully recommend the above Jointer, which is simple in construction and readily adjusted.

Price, complete with file . . . \$5.75 per dozen Extra Files . . . \$1.50 per dozen  
Packed one-quarter dozen in box.

## STAR SAW-SET

FOR HAND, BACK, BAND, WEB, WOOD AND SMALL CIRCULAR SAWS,  
NOT THICKER THAN 18 GAUGE

Prominent among the advantages claimed for this set is that it can be operated by the foot by means of a treadle, thus leaving the hands free to guide the saw; or it can be used by striking on the top with a light mallet.

A is the plunger, which can be operated by a treadle attached to E, under the machine, and a slight tap with the foot will set the tooth; B, the hammer or striking part; C, the anvil; D, the movable gauge; F, the screw to regulate the amount of set. The striking part and the anvil, or portion which receives the blow, are star-shaped, and similar in construction. The points are all of different sizes, and are numbered from 1 to 6, and are designed to set different sized teeth. It will strike a blow as sharp and effective as though done by a hammer, and is the most useful and complete saw-set that has ever been offered. If the saw is hard, several blows should be given in setting it. Raise the back of the saw from the guide-screw F, when the first blow is given, and gradually lower it with each blow until the process is complete. With each set is included a gauge for holding narrow blades, such as Web saws, etc., in position during operation of setting.

Price . . . \$10.00 per dozen  
Packed one-quarter dozen in box.

## SAW CLAMPS

ADJUSTABLE, No. 1

No. 1  
IMPROVED  
BALL and SOCKET  
CLAMP

By the use of this clamp, a saw can be held straight or at any angle the operator may desire. Length of jaw, 9 in.

No. 1. Japanned, \$11.00 per dozen.

No. 2. Japanned, Length of jaw 9½ in. \$9.00 per dozen.

IMPROVED, No. 2

## REVOLVING SAW-SET

No. 1. Large, \$6.00  
per dozen

No. 2. Small, \$4.75  
per dozen

Packed one-half dozen in box

ADJUSTABLE, No. 4

Particularly adapted for use when filing narrow band, web saws, etc. The supporting arms are adjustable, and can be regulated to suit the various widths of saws to be filed, the blade being maintained in the same position throughout and by slightly raising lever, can be moved along.

No. 4. Japanned (length of jaw, 12½ inches) .....\$18.50 per dozen

## SAW CLAMPS

HANDY, No. 5

Patented December 27, 1900

FASTENED TO BENCH BY SCREWS

Length over all, 14½ inches. Filing length of jaw, 13 inches. Weight, 3¼ lbs.

No. 5. Japanned .....\$10.00 per dozen

HANDY, No. 6

Patented December 27, 1900

FASTENED TO BENCH BY SCREW LUGS

Same pattern and dimensions as No. 5 with the addition of screw lugs for fastening to bench. These lugs fold closely to body of clamp. Weight, 5 pounds, 9 ounces.

No. 6. Japanned .....\$14.00 per dozen

The Handy Saw Clamp was designed with the particular view of making it light in weight and at the same time strong and durable; to take up the least possible space and easily carried in a tool chest.

The material is grey iron, the arches are reinforced to give the requisite strength where needed. Tightened by means of the eccentric lever permits of quick and positive action. There being three points of pressure on the jaw, proper contact with the blade is obtained along the entire length without the use of rubber packing, which insures the holding of the saw-blade firmly and rigidly in position.

Packed one in pasteboard box

Trade Mark  
Registered  
U. S. Patent Office

D3

## SAW FILING GUIDE

Patented Dec. 12, 1893

ESPECIALLY DESIGNED TO ASSIST THOSE NOT SKILLED IN THE ART OF  
SAW-FILING TO FILE A SAW CORRECTLY

## DIRECTIONS

This cut shows a saw and the guide in proper position for filing. There are three marks on the upper hub of the swivel attachment, and one mark on the other. One of the three marks shows when it is in position for one side and the other designates when it is in position for filing the other side. The third, or centre mark, shows when it is in position for filing Rip Saws. To obtain the correct position loosen the wing-nut and move the guide around to the point desired; after tightening wing-nut, loosen screw in file handle and adjust the file for the shape of tooth wanted.

A good way is to select a tooth of correct shape and let file down into it, tighten set-screw in handle, then file a tooth to see if the shape suits. If not, turn the file a little to the right or left and try another tooth until the proper shape is obtained. Then file every other tooth. When one side is filed, reverse saw and attachment and file the other teeth. For Rip Saws, place the file at right angles with the saw, as mentioned above, and file every tooth. Always keep the file as nearly horizontal as possible. USE A 5½-INCH DISSTON SLIM TAPER FILE.

Length of jaw, 12½ inches. Price includes Clamp, Filing Guide, File and Handle.

D3 Guide and Clamp, complete.....\$30.00 per dozen

Packed one in wooden box, weight 20 pounds

Trade Mark Registered  
U. S. Patent Office

D2

## SAW FILING GUIDE

Patented December 12, 1893.

For instructions as to use, see D3, page 120. Length of jaw, 9½ inches. Price includes D2 Guide, Clamp, File and Handle, complete.....\$24.00 per dozen

Packed one in pasteboard box. Weight, 7 pounds each.  
Where a heavier and stronger clamp is wanted, we recommend the D3.

## STANDARD WIRE GAUGE, No. 5

No. 5. 1 to 26.....\$32.00 per dozen

Packed half-dozen in box.

## DISSTON STANDARD WIRE GAUGES

PERFECTION ATTAINED

ACCURACY GUARANTEED

No. 1. Small Gauges, 1 to 26 ..... \$20.00 per dozen

No. 2. Large Gauges, 0 to 29 ..... \$35.00 per dozen

No. 3. 0 to 29 ..... \$28.00 per dozen  
" 4. 1 to 26 ..... 25.00 "

To insure perfect accuracy, it is absolutely requisite that our gauge and that of our customers should be alike, and to this end we have been compelled to enter the field in this delicate branch of manufacture. Our success is complete, and we are making a correct standard gauge, which we warrant, and sell at a low price.

ALL GAUGES MADE TO STUBBS' OR BIRMINGHAM STANDARD

Packed half-dozen in box.

## HENRY DISSTON ORIGINATED AND PATENTED THE SKEWBACK HANDSAW

JUNE 23, 1874

*"For Beauty, Finish, and Utility,  
this Saw cannot be Excelled."*

*Henry Disston*

(THE ONLY ORIGINAL BRAND THEN AND NOW)

## DISSTON HAND SAWS

are manufactured throughout at the Disston Works. The steel, high-grade Crucible Steel, is made in the Disston Steel Works after a formula demonstrated by years of experience to be particularly adapted for Hand Saws; the blades, properly shaped, are hardened and tempered under the exclusive Disston processes; accurately ground by the special Disston method, insuring uniformity, giving an even thickness along the entire tooth-edge, tapering thinner to the back and from handle to point, requiring very little set to the teeth for clearance of the body of blade in the cut, thus making a narrow kerf and easy running; accurately tensioned for true cutting, the teeth of right shape, evenly set and sharpened for fast, smooth work; while the handles, made of selected lumber, long and well-seasoned, are symmetrical in all proportions, formed with a comfortable hand-hold and each securely fastened on its blade in such a position as to give the correct "hang" or pitch to the saw when entering the work, making it feel light and well balanced, feeding into the wood with the least exertion.

These are the points of merit by which Disston Saws have earned and maintained long-continued supremacy for high Quality, excellence of Workmanship and greatest Efficiency.

The Brand *Disston* is reserved exclusively for the high-grade goods which are never sent out under any other brand.

SAWS AND TOOLS BEARING THE BRAND  
"DISSTON" CARRY A FULL GUARANTEE

## ORDER ALL HAND SAWS BY THE NUMBER OF POINTS TO THE INCH

The following cuts are full size of the respective number of teeth and points per inch which they represent. It will be noticed that in one inch space, there is **one tooth less** than there are **points**.

Rip Saw Teeth six points and coarser are graduated from butt to point of blade, the narrow end being one point to the inch finer than at butt; the "points" being measured at butt of blade.

## DISSTON

WARRANTED EXTRA REFINED LONDON SPRING STEEL, PATENT GROUND AND  
TEMPERED, HAND, PANEL AND RIP SAWS

Trade Mark Registered  
U.S. Patent Office

This is the latest and finest Handsaw ever made. Genuine Rosewood handle, carved and polished. The blade is Disston Skewback design, exceptionally high finish, made from Disston Highest quality Crucible Steel, and fastened in the handle with nickel-plated screws. Our many years' experience and wide knowledge in the making of a perfect saw steel has enabled us to produce a blade for this saw that cannot be duplicated elsewhere.

**No. D. 15.** Same quality and finish as D115. Straight back.

inches							
\$22.00	24.00	26.00	29.00	31.00	32.00	36.00	40.00 per dozen

Thumb-hole in Handle

**NOTE:** A fast, smooth-cutting saw; particularly adapted for fine cabinet work, sawing mitres, and in all instances where rapid, smooth cutting is required. It will cut a joint sufficiently smooth to glue without planing. In sharpening, care must be used to file the teeth at the same angle as they leave the factory. These saws are warranted to run without set in dry, seasoned lumber only, and are not for general use. They are high in temper, specially ground for clearance and require no set.

To properly file the No. 120 saw, a DISSTON SIX-INCH SAFE BACK CANT FILE, made expressly for this purpose, should be used.

Made with Cross-cut or Rip Teeth at same price  
For number of screws in Disston Saws, see page 163

Packed one-third dozen in box

## DISSTON

## DISSTON

WARRANTED REFINED CRUCIBLE STEEL, PATENT GROUND AND TEMPERED, HAND, PANEL AND RIP SAWS

Trade Mark Registered U. S. Patent Office

**"D"**

This is the original Skewback Saw, and has proved to be the most popular saw in the world. Skewback, Refined Crucible Steel Blade, Warranted; Apple handle, full Polished, Brass screws.

These Saws have all the latest improvements in hand saws, and are warranted superior. They combine the popular "Skewback," the peculiar shaped butt or heel which, with the new screws, makes it almost impossible to work loose from the handle, and gives the full sweep of the Saw without the possibility of catching in the work. This saw was originated and patented by HENRY DISSTON in 1874.

	16	18	20	22	24	26	28	30
Thumb-hole in Handle								
	\$14.75	\$16.25	\$18.00	\$20.00	\$21.50	\$22.50	\$25.50	\$28.50 per dozen

**D 30.** Same as D8, with straight back. Same price.

Made with Cross-cut or Rip Teeth at same price  
For number of screws in Disston Saws, see page 163

Trade Mark Registered U. S. Patent Office

**D17**

Patent applied for

Skewback, Refined Crucible Steel Blade, Warranted. Hardwood Handle, full Polished, Brass Screws

The combination of teeth in this saw, alternate sections of five regular cross-cutting teeth and two ripping teeth, separated by numerous deep gullets for full clearance, insures free running, easy, very rapid and clean cutting in heavy work, whether cross-cutting or ripping, and especially for sawing diagonally across the grain, as its name implies.

This saw is particularly adapted for general construction work of all kinds; studding-up houses, shoring for sewers, making forms for concrete buildings, railroad work, millwright, farm use, etc.

The Disston Double Duty Saw far exceeds any other pattern of saw ever made for like utility, and is easily kept in order.

**D17.** Made in 26-inch length only \$25.00 per dozen

Packed one-third dozen in box

DISSTON

COMPACT, 1874

The above is an evolution of the Compact Saw originated by Henry Disston in 1874. The "let in" or close-up handle allows full sweep of the blade, reduces the length over all, occupying small space in the kit.

Same quality as D8. Apple Handle.

Length, over all, 26 inches. . . . . \$22.50 per dozen

CENTENNIAL, No. 76

Trade Mark Registered  
U. S. Patent Office

No. 76, Centennial. Skewback, Crucible Steel Blade, Warranted, Apple Handle, Polished, Brass Screws.

16	18	20	22	24	26	28	30 inches
\$14.00	15.00	17.00	19.00	20.00	21.00	24.50	28.00 per dozen

DISSTON, NO. 77

For use in Dry, Seasoned Lumber only

No. 77. Extra London Spring Steel Blade, Warranted, Apple Handle, Polished, Brass Screws.

16	18	20	22	24	26	28	30 inches
\$17.50	19.00	20.00	22.00	24.00	25.00	29.00	33.00 per dozen

NOTE:—The No. 77 Saw is particularly adapted for fine cabinet work, sawing mirrors, where rapid and smooth cutting is required. The use of a plane can be dispensed with, as they will cut a joint sufficiently smooth to glue without planing. In sharpening, care must be taken to file the teeth at the same angle as they leave the factory. Use a 4½-inch regular taper file. These Saws are warranted to run without set in dry, seasoned lumber only, and are not for general use. They are high in temper, specially ground for clearance and require no set.

Made with Cross-cut or Rip Teeth at same price  
For number of screws in Disston Saws, see page 163

Packed one-third dozen in box

DISSTON

WARRANTED REFINED CRUCIBLE STEEL, PATENT GROUND

No. 38. Combination Saw, with 24-inch Square and Rule, Straight-Edge and Scratch Awl; Apple Handle. Blade same as "Brown's," No. 3.  
26 inches ..... \$17.00 per dozen

No. 39. Combination Saw, with 24-inch Square and Rule, Straight-Edge and Scratch Awl; Apple Handle, with Plumb and Level attachment. Blade same quality as "Brown's," No. 3.  
26 inches ..... \$22.00 per dozen

No. 29

No. 29. Combination Saw, with 24-inch Square and Rule, Straight-Edge and Scratch Awl; Beech Handle.  
26 inches ..... \$12.00 per dozen

Combination Hand Saws made in 26-inch length only

Packed one-third dozen in box

GAUGE SAW

Adapted to tenoning, shouldering, dovetailing, curving, cog-cutting, or any purpose where a definite depth of cut is required. Same quality as Disston, No. 7.

This Gauge can be placed on any DISSTON SAW at an advance of \$5.00 per dozen.

REMOVABLE-BACK SAW

This saw can be used with equal facility for either Hand or Back Saw. When the back, A, is removed the saw can be used as a Hand Saw. Replace the back and a first-class Back Saw is the result. Same quality as Disston, No. 7.

This Back can be placed on any STRAIGHT-BACK DISSTON SAW at an advance of \$5.00 per dozen for all lengths.

Made with Cross-cut or Rip Teeth at same price.

SHIP CARPENTERS' SAWS

Also suitable for cabinet-makers, pattern-makers and work where a narrow saw is desirable.

No. 7  
SHIP CARPENTERS'  
SAW

Lengths, 18 to 28 inches. Price, same as No. 7 Saw.

Trade Mark Reg.  
U. S. Pat. Office

"D" SHIP CARPENTERS'  
SAW

Lengths, 18 to 28 inches. Price, same as D100 Saw.

Ship Carpenters' Saws are manufactured in all Disston Patterns, at the same prices as the regular saw. Regular Ship Carpenters' Saws are made 6 1/2 inches wide at butt, 1 1/2 inches wide at the point for 26 inches, other sizes in proportion to their lengths.

Made with Cross-cut or Rip Teeth at same price.  
For number of screws in Disston Saws, see page 163.

Packed one-third dozen in box

## D-19 FLOORING SAW

Patented November 2, 1909

Cherry Handle, Carved and Polished, adjustable to various positions.

This Saw has been especially designed to fill the need of a tool by which the Mechanic can cut out any particular section of floor, partition or ceiling to any depth desired without the necessity of boring holes, chiseling, etc. Sections cut out with this saw can be replaced in original position if desired. The Blade is reversible, interchangeable and adjustable to various positions, and held firmly in place by patent bolt and ratchet. The lever is also adjustable, and can be placed in proper alignment with handle by turning bolt backward or forward as desired.

D-19 Flooring, 16 inch, \$19.00 18 inch, 20.00 20 inch, 22.00 per dozen

Packed one-third dozen in box

## PLUMBERS' SAW, No. 10

Cherry Handle, Carved and Polished, adjustable to various positions.

Made particularly for use on work encountered by mechanics in making repairs where it is necessary to cut through joists, rafters, flooring, etc., in which nails may be embedded. Also for cutting soil pipe, gas pipe, etc.

# MITRE-BOX SAWS

Made in **Disston Quality only**, their accuracy and efficiency is recognized as The Standard by the prominent manufacturers of Mitre Boxes.

## DISSTON MITRE-BOX SAW, No. 4

HENRY DISSTON & SONS

Crucible Steel Blade, Apple Handle, Polished Edge, Brass Screws, Blued Back.  
The following prices are for saws measured the full length of the blade.  
The peculiar shape of butt or heel in these saws makes the toothed edge about 2 inches shorter than the full length of the blade. Mitre-Box Saws are regularly made 11 points to the inch, 19 gauge in thickness.

## "MECHANICS' OWN" BACK SAW, No. 77

TO RUN WITHOUT SET

These Saws are particularly adapted for fine cabinet work, sawing mitres, and where rapid and smooth cutting is required the use of a plane can be dispensed with, as they will cut a joint sufficiently smooth to glue without planing. Regularly made 8 points to the inch, except for about 14" at the front where the teeth are 12 points to the inch. In filing use a 43-inch slim taper file.

8	10	12	14	16	inches

## DISSTON HANDY SAW KIT, No. 101

The combination of Blades in any of these sets provides a Handy Kit for the practical mechanic, householder, farmer, etc.

Patented Nov. 2, 1909

Adjustable Handle \$1.50 per doz.

12-inch Keyhole \$2.25 per doz.

14-inch Compass \$2.75 per doz.

16-inch Pruning \$7.00 per doz.

18-inch Plumbers' \$11.00 per doz.

20-inch 10 Point Cross-cut \$11.00 per doz.

20-inch 7 Point Rip Saw \$11.00 per doz.

Hardwood Handle, Carved and Polished, with a special lever device which is arranged to hold the blades comprising the Sets rigid and the special formation of the butt of the blades prevents wobbling.

The special shaped Lever Bolt, permits by a quarter or half turn of same, the keeping of the Lever in position so it will not interfere with the working of the saw.

The Plumbers' Saw Blade is specially tempered for cutting nails, spikes, bolts, gas pipe, soil pipe, etc.

The blades are made of DISSTON CRUCIBLE STEEL, ground and polished.

PLUMBERS' NEST OF SAWS, No. 60  
FOR MISCELLANEOUS WORK

The No. 60 Nest of Saws consists of Handle, Tightener and Three Blades—one 18-inch blade specially tempered for the cutting of wood in which nails may be imbedded, lead pipe and that class of work encountered in the ordinary course of plumbing, one 14-inch Compass Blade and one 10-inch Keyhole Blade.

## ADJUSTABLE HANDLE. NO SCREW-DRIVER REQUIRED

The blades are fastened in the Handle by means of the special lever device, which is so arranged as to take in the different thicknesses of the various blades, the pin in Bolt-head being moved forward or backward, as may be required; and this, at the same time, permits the keeping of the Lever on a line with the Handle, so it will not interfere with the working of the saw.

## CABINET SAW, No. 80

NICKEL-PLATED LEVER TIGHTENER

Patented  
Nov. 2, 1909

Cherry Handle, Carved and Polished. Disston Crucible Steel Blade, Warranted. One edge toothed 10 points for cutting with the grain; the other, 15 points, for cross-cutting.  $\frac{1}{4}$ -inch hole in end for hanging up saw.

The blade is securely fastened in handle by the lever tightener, which permits a quick adjustment of the handle according to the tooth-edge to be used.

Especially adapted for fine work, such as cabinet, pattern making, mitering, etc.

## "LITTLE GIANT" PRUNING HOOK AND SAW

## SIMPLE AND DURABLE

The Knife and Saw are both made of the best Crucible Steel, and can be used with or without a pole. The tool is strongly made and durable. The Saw is detached where its use is not required on large limbs.

This Pruner fills a long-felt need, as it combines two useful tools in one, without increase of cost to the user.

The Saw-blade is attached to the Hook by means of two clamp-screws, as shown in the accompanying cuts, which also show the method of attaching a Pole or Handle. We also make a Pruning Hook of this style without the Saw Attachment.

Hook and Saw (without pole), \$18.00 per doz.  
Length of Blade, 12 inches.

Hook only (without pole), \$12.00 per doz.

Hook will take in Branch  $\frac{3}{4}$  in. Diameter.

Packed one-sixth dozen in box.

IMPROVED  
PRUNING SAW  
AND KNIFE  
No. 20

Lapanned Frame (without pole) .....\$11.00 per dozen

This Saw is designed for attachment to a pole, so the upper branches of trees can be reached without the aid of a ladder, the Knife or Saw being brought into requisition as may be required. When desired, the Pole can readily be detached, the socket on the Frame forming an excellent handle.

The peculiar formation of the Tooth enables the Saw to cut both ways, causes an equal strain on the limb, insures smooth and rapid execution, and prevents the saw from becoming jammed in cutting green wood. Length of saw, 10 inches.

# "THE ORCHARD" PRUNING HOOK AND SAW

This tool meets general requirements. The economy of combining two tools in one will be appreciated.

The Knife and Saw are made of the best Crucible Steel, and can be used with or without a pole. Although possessing great strength, it is of light construction, with crescent-shaped blade having long, slender teeth, so formed as to draw the saw into the wood. It is particularly adapted for sawing the smaller branches in general pruning.

The Saw Blade, which is attached to the Hook by two clamp-screws, can be readily removed, when the Hook only is required. We can furnish this style of Pruning Hook without the Saw attachment if so desired.

Malleable iron handle, Japanned, with socket.

Hook and Saw (without Pole) . . . . . \$18.00 per dozen  
Length of Blade 10 inches

Hook only (without Pole) . . . . . \$11.00 per dozen

Hook will take in Branch  $\frac{1}{2}$  inch diameter  
Packed one-sixth dozen in box

## No. 111 PRUNING SAW

Similar in quality and style to "The Orchard," without Pruning Hook.

Malleable iron handle, Japanned, with socket. Crucible steel, crescent-shaped blade, 10 inches in length; long, slender teeth.

The blade is fastened to handle with wing-nut and so arranged that it may be adjusted to any angle. Can be used with or without a pole.

No. 111 . . . . . \$11.00 per dozen

Packed one-sixth dozen in box

The above have tangs extending through handle and riveted.

No. 1100. Same as No. 100, without riveted tang...1.52 1.85 2.25 "

No. 1101. Same as No. 101, without riveted tang...1.75 2.10 2.47 "

LADIES' PATTERN  
HEDGE SHEARS

Same type and quality as No. 100.

No. 1. Hedge Shears, blades 6½ inch, \$1.25 each.

# HANDLES

Each Handle on the DISSTON Hand Saws is separately slit, bored and fitted to its blade, insuring the correct "Hang" to the saw when entering the work.  
The stock handle, bored and slit, will not fit holes in the blade from which old handle has been taken, for the reason given above.

Put up in box unless bundle is specified

## SAW BUCK, No. 2

No. 2. Made of carefully selected wood, well finished, with strong rod, etc.  
Price ..... \$2.95 per dozen

"PERFECTION"  
No. 3 FOLDING SAW BUCK

**No. 3.** Made of carefully selected Maple, well seasoned, natural finish. The legs are 2 inches  $\frac{1}{2}$  inch, 30 $\frac{1}{2}$  inches long, strongly braced. The malleable iron castings at each side of the centre brace support the weight, making possible a light but durable Saw Bench. The centre brace is covered with a wood cylinder 2 x 14 inches. This cylinder revolves, and serves to protect the brace from the saw. When opened, the top of centre brace is 15 $\frac{1}{2}$  inches from the ground.

Price \$4.25 per dozen

Handles specially made with thumb-hold, giving an easy, comfortable grip and perfect control over the saw

## FLAT BACK, No. 13

Cherry Handle, Polished Edges, Nickel-plated Screws, Flat Back, 1 inch x 1/4 inch, special temper and tension. Depth from inside centre-edge of 24-inch frame to tooth-edge of blade, 5 1/4 inches. Clock-spring blade, 24 gauge, 1/2 inch wide, 13 points to the inch.

	16	18	20	22	24	26	28
No. 13	\$20.00	20.50	21.00	21.50	22.00	23.00	24.00 per dozen

The manner of inserting and fastening the blade in this saw is quick and easy. Front end of blade is fastened with a threaded screw, the blade is held at the stretcher end by a loose pin, giving a quick and easy adjustment. Diamond shape stretcher passing through a diamond shape eye, tightening with a wing nut, makes the saw sanitary.

## FLAT BACK, No. 15

Beech Handle, Polished Edge, Brass Screws, Flat Back, 1/2 inch x 1/4 inch. Depth from inside centre-edge of 24-inch frame to tooth-edge of blade, 4 1/2 inches. Blued blade, 1 inch wide, 11 points.

No. 20. Frame only.....	\$8.00	8.50	9.00	10.00 per dozen

Put up one frame in a box.

No. 200

Depth, 1 inch from tooth-edge to inside of Back.

Steel Frame, Square Stretcher, Reversible four positions, Hardwood Handle.

The low-back frame permits its use in extremely close quarters and affords better control of the blade. Adapted especially for electricians and plumbers, etc. Takes in 8-inch blade, measured centre to centre of holes.

No. 200. Frame and Blade.....\$6.50 per dozen

Packed one-sixth dozen in box.

## HACK SAW FRAMES

ADJUSTABLE, No. 110

Steel Frame, Nickeled, Riveted Sockets, Reversible, Black Hardwood Handle. Blade easily inserted. Stretchers will not fall out while readjusting. Adjustable 8 to 12 inches. Depth from inside edge of frame to tooth-edge of blade,  $3\frac{1}{4}$  inches.

No. 110. Nickeled, Frame only.....\$8.00 per dozen  
Packed one frame in box.

## EAGLE HACK SAW, No. 115

Japanned Frame and Handle. Stretcher made with a square stock, preventing blade from turning. The blade can readily be loosened or tightened by turning handle. Depth from inside edge of 12-inch frame to tooth-edge of blade,  $2\frac{1}{4}$  inches.

	8	9	10	12	14	
	inches					
No. 115. Frame only...	\$3.60	4.20	4.50	4.80	5.20	per dozen

Packed one in a box.

## SCREW SLOTTING HACK BLADES

Disston Special Crucible Steel, tapered and hollow ground to run without set. Tempered so they can be refilled. Milled teeth. Put up in a set of four blades, one each.

Length of blades measured from centre to centre of holes

Trade Mark Registered  
U.S. Patent Office

## HACK SAW BLADES

"CHROMOL," Hardened throughout

LENGTH MEASURED FROM CENTRE TO CENTRE OF HOLES

MILLED TEETH

Made of "CHROMOL STEEL," a high-grade material peculiarly suited for Metal-cutting Blades. The teeth are milled, giving the greatest possible strength, and making them sharp and clean; set in such a manner that every third tooth is straight—acting as a cleaner—while the two intervening teeth are set alternately right and left. This arrangement allows each tooth to do its full share of the work, and the action of the cleaner tooth, to a great extent, relieves the set teeth of part of the wear, which considerably prolongs the life of the blade.

They are hardened by the DISSTON process, which renders them hard and tough without being brittle.

For hand frame use we recommend blades with Number of "Points" as follows:

Soft steel, cast iron, etc., and all general work ..... 16 points or 15 teeth  
Tool steel, light angle iron and hard metals ..... 18 " " 17 "  
Brass, Copper, Drill Rods, Iron pipe and sheet metal ..... 24 " " 23 "  
Tubing and Metal thinner than 22 gauge ..... 32 " " 31 "

IN ORDERING, SPECIFY NUMBER OF TEETH OR POINTS WANTED  
OTHERWISE 16 POINT OR 15 TOOTH BLADES WILL BE SENT

Length	Width	Thickness	Points to Inch		List Price per Gross
8"	$\frac{1}{2}$ "	.025 or 23 ga.	16	18 24 32	\$8.00

SOFT-BACK Hacksaw Blades, with milled teeth, same price as Chromol.

## MACHINE HACK SAW BLADES

"CHROMOL" HARDENED THROUGHOUT, FOR MACHINE OR POWER USE

Trade Mark Registered U.S. Patent Office

MILLED TEETH

These Blades are made of the same steel, teeth milled in and set in the same manner as the Chromol Blades for hand use.

We recommend the following "Points" to the inch for the respective classes of work

Light power ..... 15 points or 14 teeth.  
Brass, Copper, Iron pipe, etc. .... 18 " " 17 "  
Heavy power work ..... 11 " " 10 "

Furnished in sizes suitable for any make of machine.

In ordering specify width, thickness and number of teeth or points.

# HACK SAW BLADES

## DISSTON'S HOLLOW GROUND

LENGTH MEASURED OVER ALL

MILLED TEETH

We call particular attention to these blades for work requiring accuracy. They are made of Disston special crucible steel; hollow ground to run without set, and tempered so that they can be refilled.

For sawing all classes of metal they are superior to any other blade on the market, and are so acknowledged by all practical people who use them.

If desired, these blades can be furnished with fine teeth, 22 or 26 points to the inch, with or without set,  $\frac{1}{2}$  inch wide, 23 gauge. These are adapted for sawing bicycle tubing, brass, aluminum, etc.

**Locksmiths' Blades**,  $\frac{1}{2}$  inch wide, 23 [.025] or 25 [.020] gauge, 16 or 22 points. 6-inch \$6.00 8-inch \$7.20 per gross

**Jewelers' Blades**,  $\frac{1}{2}$  inch wide, 28 [.014] gauge, 30 points. 6-inch \$9.00 per gross

Always specify length from centre to centre of holes, width, gauge or thickness and number of "Points" to inch desired.

# PLASTERING TROWELS

Plastering Trowels, as illustrated on the following pages, are what are known as finishing trowels, and are always supplied when not otherwise specified.

Browning Trowels furnished when specially ordered, at same price, these being one gauge heavier than finishing trowels, and working side not ground to thin edge.

Disston Trowels are made of the highest grade crucible steel, carefully tempered and ground, the handles are mounted in the most approved manner, and are fully guaranteed.

We have been manufacturing Trowels since 1855.

# No. 0

Length of Blade	10 and 10 1/4	11	11 1/2	12 inches

6-inch	7-inch	
\$5.25	\$5.75	per dozen

Packed half-dozen in box

## BRICK TROWELS

NEW YORK, No. 11

Extra quality Crucible Steel Blade, Carefully hardened and tempered, ground to a true and correct taper.

No. 11.	7½	8	8½	9	9½	10	10½	inches
	\$9.50	10.00	10.50	11.00	11.50	12.00	12.50	per dozen
	11	11½	12	12½	13	13½	14	inches
	\$13.00	13.50	14.00	14.75	15.50	16.25	17.00	per dozen

## NEW YORK, No. 111

WITH LEATHER GRIP

No. 111.	7½	8	8½	9	9½	10	10½	inches
	\$12.00	12.50	13.00	13.50	14.00	14.50	15.00	per dozen
	11	11½	12	12½	13	13½	14	inches
	\$15.50	16.00	16.50	17.25	18.00	18.75	19.50	per dozen

Above Trowels are made with the Handle or "Lift" at three different heights. The tang extends through handle and is riveted.

Packed half-dozen assorted lifts in box  
Post at right angle to blade, insuring proper balance

# BRICK TROWELS

NEW YORK, No. 11½

Extra quality Crucible Steel Blade, carefully hardened and tempered, ground to a true and correct taper.

	7½	8	8½	9	9½	10	10½ inches
No. 11½.	\$9.50	10.00	10.50	11.00	11.50	12.00	12.50 per dozen
	11	11½	12	12½	13	13½	14 inches
	\$13.00	13.50	14.00	14.75	15.50	16.25	17.00 per dozen

NEW YORK, No. 111½

Similar to No. 11½ with Leather Grip.

	7½	8	8½	9	9½	10	10½ inches
No. 111½.	\$12.00	12.50	13.00	13.50	14.00	14.50	15.00 per dozen
	11	11½	12	12½	13	13½	14 inches
	\$15.50	16.00	16.50	17.25	18.00	18.75	19.50 per dozen

These Trowels are of same quality and design as our No. 11 and 111, with the exception that the tang does not extend through handle, thus giving a solid wood end, which is preferred by some users.

Made with the "Lift" or hang of handle at three different heights.

Packed half-dozen assorted lifts in box

Post at right angle to blade, insuring proper balance

Packed half-dozen in box

Post at right angle to blade, insuring proper balance

## BRICK TROWELS

## "PEERLESS"

This is the highest type, the very ACME OF PERFECTION in Trowel making. Each DISSTON Trowel is made from a single diamond-shaped piece of steel from one end of which is forged the tang. The steel—DISSTON CRUCIBLE STEEL—is of a quality adapted for trowel blades, which are highly tempered, taper-ground, and possess the characteristic spring, giving greatest efficiency.

The post being straight, or at right angles with the blade, gives better balance in use.

The handles made of hickory, polished; reinforced with a long, heavy nickel-plated steel ferrule.

For efficiency, lasting qualities and beauty of finish these Trowels establish a new standard.

## PEERLESS, No. 40

	9½ and 10	10½	11	11½	12 inches
No. 40	\$18.25	18.75	19.25	19.75	20.25 per dozen

## BRICK TROWELS

MANHATTAN, No. 30

Extra quality; wide heel, crucible steel blade. Carefully hardened and tempered; ground to a true and correct taper.

	9½	10	10½	11	11½	12	inches
No. 30. Wood Handle	\$11.50	12.00	12.50	13.00	13.50	14.00	per dozen
No. 130. Leather Handle	\$14.00	14.50	15.00	15.50	16.00	16.50	"

NEW ENGLAND, No. 31

Trowel designed to meet a growing demand for a short, wide heel trowel. This trowel is 6½ inches wide at the widest part of the heel, making it an extremely well-balanced tool.

Each Disston Trowel is made of a single diamond-shaped piece of steel, from one end of which is forged the tang. The steel—Disston Crucible Steel—is of a quality especially adapted for trowel blades, which are highly tempered, bevel ground, and possess a characteristic spring, giving greatest efficiency.

The post being made straight, or perpendicular to the blade, gives better balance in the working.

Made with either leather or wood handles; long, heavy ferrule, fastened to the tang in such a manner that it will not work loose.

	8½	9	9½	inches
No. 31. Wood Handle	\$10.50	11.00	11.50	per dozen
No. 131. Leather Handle	\$13.00	13.50	14.00	"

Made in the above lengths only.

Packed half-dozen in box—assorted weights

Post at right angle to blade, insuring proper balance

CLOSED

Length, 56 inches.....\$34.00 per dozen Length, 59 inches.....\$24.00 per dozen  
"Samson" made with 6, 8, 10, 12-foot handles, special price

The handles of the "Samson" are made of Maplewood and the Rapid of Ash Wood, carefully selected, the blades of both are 9 inches long and made of solid steel, forged to shape.

These Diggers have been thoroughly tested and have given the greatest satisfaction to all who have used them. They work free and easy and are far superior to all plungers, augers and boring tools.

The Rapid can also be used as a transplanter.

The cuts on the left show the Diggers, with blades open, ready for plunging, those on the right showing how the dirt is grasped.

# DITCH BANK BLADES

DISSTON  
DITCH BANK BLADE

Designed for Cleaning Ditch Banks; Plantration work; Destroying Cherokee Hedges; Trimming Trees; Cleaning Railroad Rights of Way, etc. Highest Grade Crucible Spring Steel Blade; Polished and Etched; Blade Extends into Handle and Riveted Over Metal Plate. Supplied with Plates and Rivets only; no Handles.

Ditch Bank Blade, 21 $\frac{1}{2}$  ins. long; width, 7 $\frac{1}{2}$  ins.; length of cutting edge, 18 inches....\$25.00 per dozen

per doz.

Packed half-dozen in box

The above Bevels can be furnished with Thumb-screw in place of Lever Tightener, if so ordered

# MITRE SQUARE, No. 10

No. 10. Rosewood Stock, Heavy Brass Face-plate, Special L-shaped Steel Blade, as No. 15 below.

Graduated to  $\frac{1}{16}$ ths

$\frac{4}{16}$	$\frac{6}{16}$	$\frac{7}{16}$	$\frac{9}{16}$	$\frac{12}{16}$ inches
\$7.25	9.50	10.65	12.85	16.00 per dozen

# TRY SQUARE, No. 15

Rosewood Stock, polished, with Flush, Heavy Brass Face-plate. This plate is fastened to the stock by a special method, which insures security. The blade consists of a solid piece of steel, L-shaped, one arm of which extends through slotted stock, flush with back and is fastened therein with heavy brass rivets; thus the stock is practically a part of the blade, insuring perfect rigidity, and making it impossible to get out of true.

Graduated in  $\frac{1}{16}$ ths when specially ordered at same price.

Trued inside and out. Made in the following lengths only:

	$\frac{4}{16}$	$\frac{6}{16}$	$\frac{8}{16}$	$\frac{10}{16}$ inches
No. 15	\$5.70	8.10	9.80	12.00 per dozen

Length measured from inside of stock to end of blade

# TRY SQUARE, No. 5

Extra Wide and Thick Rosewood Stock, Heavy Brass Face-plate, Extra Wide Steel Blade, Tempered and Blued. Not graduated. Square inside and out.

Packed half-dozen in box.

# GAUGES

DESIGNED ESPECIALLY FOR USE IN MANUAL TRAINING SCHOOLS

No. 80 1/2

Made of hardwood; oval head, with brass screw; two brass strips inlaid in the face. Steel point. The oval shape of the head enables the user more easily to manipulate the gauge.

No. 80 1/2 ..... \$5.90 per dozen

No. 83

This gauge is similar to the 80 1/2 gauge; hardwood; oval head, with brass screw; two brass strips inlaid in the face.

The bar is **not** graduated. This cutter will not follow the grain of the wood, and insures accurate work.

No. 83 ..... \$6.90 per dozen

Packed half-dozen in box

No. 32

Round Crucible Steel Blade, hardened and tempered, bright finish. Extends entirely through handle and is capped on the end. Hardwood handle, nickel-plated ferrule.

Blade is securely fastened in handle with a rivet passing through ferrule, handle and blade, headed on both ends.

	3	4	5	6	7	8	10	12	inches
No. 32	.....	\$5.00	6.00	7.00	8.25	9.25	10.25	12.50	14.00 per dozen

No. 38

THE STRONGEST DRIVER MADE

(Patent Applied For)

The No. 38 Screw driver will withstand the hardest work. The blade is made of Crucible Steel, specially Hardened and Tempered throughout. Handle of Hardwood, black finish. Long, heavy, Nickel-plated Ferrule.

The blade is fastened in the handle by a method which prevents its turning or coming loose.

Automobilists and others will particularly appreciate the strength of this screw driver.

Packed one dozen in box

INSULATE, No. 50

PARTICULARLY ADAPTED FOR ELECTRICIANS' USE

Crucible Steel Blade, carefully hardened and tempered; is embedded in a hard Rubber Handle, so fastened that it will not work loose.

The solid rubber acts as insulation.

The Handle, hard rubber, is of a texture eliminating brittleness, strong, tough and durable, pressed to form, the grip is milled, and the extended rings prevent the hand from slipping or touching the blade.

This is a practical, high-grade screw-driver, beautifully finished.

No. 50	6-inch (over all)	.....	\$16.00 per dozen

HENRY DISTON & SONS

## MASON'S, No. 105

<b>No. 105.</b>	A light, reversible level, made of well-seasoned Cherry, 2½ inches wide, 1 inch thick. Fitted with six proved glasses (four plumb and two level), all adjustable. Improved Diston Grip ends protected with brasscaps.	Inches 42	Per dozen \$54.25
-----------------	---	--------------	----------------------

## ADJUSTABLE PLUMB AND LEVELS

With the Diaston Adjustable Plumb and Levels, the adjusting of two screws (*A* and *B*) will enable anyone to true up the bubble. The simplicity of this adjustment is one of the features that makes these levels appeal to mechanics. As the illustration shows, there are no springs to get out of order, nor will the screws rust in damp weather and interfere with the adjustment.

In case of a broken glass the adjustment can be readily taken out and new glass inserted.

### DIRECTIONS FOR ADJUSTING

To adjust the level, remove the protecting shield *C*; loosen flat-head screw *A*, raise or lower round-head screw *B* until bubble is true; then tighten screw *A*. To adjust plumb, remove the protecting shield; loosen one screw and tighten the other until the bubble is true. For List of Adjustable Plumb and Levels, see following pages.

## DISSTON

IS WARRANTED AS PERFECT AS A FILE CAN BE MADE

**SLIM TAPER**

**TAPER**

**SQUARE**

**BLUNT BAND**

**MILL**

**FLAT BASTARD**

**HALF ROUND**

**ROUND**

**HALF ROUND WOOD RASP**

We manufacture a full line of the various kinds and sizes of Files. We have been making files since 1872.

They are made of Disston high quality Crucible Steel, carefully forged throughout, teeth well-formed, and hardened by our special process.

We use 35,000 dozen Disston Files annually in our own Works, therefore know what a good file should do and make Disston Files so they will do it.
