# SPECIAL NOTICE TO BUYERS

---

*All Our Harness are Made on the*

## Campbell Lock-Stitch Wax-Thread Machine

*A Thorough Test will Convince You of its Superiority to Hand-Made Work.*

FIRST. The awl-holes are more solidly filled with thread than is possible in hand stitching.

SECOND. The stitches are drawn with an evener and more powerful tension than can be produced by hand.

THIRD. The work is more uniform in quality.

FOURTH. For these reasons it is firmer and more durable than hand work, and *it absolutely will not rip.*

FIFTH. The stitching looks alike on both sides; hence in this respect cannot be told from first-class hand work.

The time has passed in the history of business when a manufacturer can go to his customers successfully with the plea that the goods he offers them are *almost* as good as those made by his competitor. For this reason have your Lock-Stitch work sewed on the Campbell Machine.

*All* admit its superiority, but *some* have adopted the questionable policy of using the Campbell on their finest work and sewing the bulk of their harness on *admittedly inferior* Lock-Stitch Machines, which is passed off on their customers as Campbell Machine Work. *We guarantee that every Lock-Stitch Harness made on the CAMPBELL MACHINE will give satisfaction.*

*We Sell to Dealers Only.*

*We Send Out No Goods on Consignment.*
