## This Will Interest You Read It

Everything listed in this book is made with a fixed purpose in view. They have been made with the idea of supplying RELIABLE PEOPLE WITH RELIABLE GOODS—the very best the market affords.

Atkins Silver Steel is the finest crucible steel that has ever been put into saws. It could not be better if it cost twice as much. It is made for us under our own secret formulas as best suited to the different types of saws in which it is to be used. Subjected to our secret process of gas tempering, it acquires that perfect degree of hardness and stiffness without being brittle that enables it to stand up to its work the longest.

Every process of manufacture is in the hands of experts who guide the work through to a successful completion, so that the finished product is as perfect as money and brains can produce. You may rest assured that every saw bearing the name of Atkins is one that you can use yourself or recommend to your customer with confidence. The saving of a few dollars in the cost of manufacture has no attractions for us, because we have established our business on the QUALITY basis and do not cater to the buyer of unreliable merchandise.

As manufacturers, we offer the manufacturers brand, which MUST be reliable. Careful inspection is made after each particular operation, thus insuring a uniformity of output. So that the product of our factory bearing the name of "Atkins" may always be relied upon as uniform and fully up to our high standard of quality in every respect.

You will also notice the most complete line of Saw Tools and Specialties for the proper care of saws that has ever been shown within the covers of any book. These are the most improved inventions of the age in the Saw Tool line, and show the most marked advancement in this department of manufacture.

### TOOL MANUFACTURING DEPT.—SPECIAL SAWS.

We have unsurpassed facilities for the manufacture of any specialty or tool in which sheet steel is to be used, and would be pleased to submit most favorable prices.

### OUR MACHINE KNIFE DEPARTMENT.

As in all other lines shown herein, we excel on Machine Knives of all descriptions. This is an entirely separate department where a specialty is made of only the best knives of every class. No style of knife is too complicated for us, and the features of material, welding and accurate grinding are given the most minute consideration.

### OUR BRANCHES.

We carry a complete line of Standard Saws of every description at all our Branches named at top of pages, as well as Knives and Mill Supplies, thus insuring the benefit of prompt delivery and lowest freight rates. Orders sent to any Branch will receive prompt attention.

### REPAIR WORK.

Complete Repair Shops are maintained at Atlanta, Memphis, Minneapolis, New Orleans, Portland, San Francisco, Seattle and Indianapolis for prompt and accurate execution of work of this character.

Holding ourselves in readiness to serve you, we remain,

**E. C. ATKINS & CO., Inc.**  
The Silver-Steel Saw People

## TERMS OF WARRANTY.

Each saw is warranted as true as it is possible to make it, and free from flaws and seams. If found to be defective in any of these particulars it may be returned, and if, upon examination, the saw is found to be at fault, all necessary repairs will be made free of charge or a new saw given in exchange, provided it is returned within thirty days from delivery.

Saws cracked or broken, as the result of filing square corners in the gullets, or from using a cold-chisel or punch in re-toothing, will not be replaced under our warranty.

Any alterations in the holes of a circular saw by filing, reaming, or otherwise, will generally spring the saw. When such alteration is made, the saw will not be subject to above warranty.

The name of "E. C. Atkins & Co." on a saw is assurance to the buyer of its superior quality and reliability.

**E. C. ATKINS & Co., INC.**

## OUR CANADIAN FACTORY.

We are pleased to show, on one of the previous pages, a birdseye picture of our new CANADIAN FACTORY. This is located at Hamilton, a point which is admirably situated to take care of our rapidly growing Canadian business.

We shall manufacture at this point, a full line of Saws, including Bands, Circulars, Drag, Gang and Mill Saws of all kinds, as well as Cross-Cut Saws, Hand, Wood and Small Saws.

We are in a position to take care of any Canadian business entrusted to us, promptly and satisfactorily.

## Special Notice

Unless parties are known to us or furnish us with satisfactory commercial reference, cash should always accompany orders, otherwise we will follow our custom in such cases and send the goods C. O. D.

Orders for all special work, saws or supplies, not catalogued, should be accompanied with a remittance.

Packages not exceeding four pounds in weight will be sent by mail when so ordered, the purchaser to pay postage and assume the risk of loss. If registered, the additional cost will be 8 cents.

All orders submitted through our agents or by mail are subject to our approval. If declined, the parties will be notified at once.

All goods are shipped at purchaser's risk.

All prices are f. o. b. factory.

Quotations are subject to change without notice and goods invoiced at current prices when shipped.

Errors in bills or shortages should be reported immediately upon receipt of goods.

Be particular to give correct and explicit shipping directions with order, and thereby avoid unnecessary delays in delivery.

All bills are payable in New York exchange or other funds current at par at Indianapolis.

We reserve the right to correct stenographic errors on quotations or other important matters, and will not be held responsible for delays caused by strikes, acts of Providence, or other unavoidable causes.

Very truly,

## THE ATKINS TELEGRAPHIC CODE.

We call particular attention to our new FIVE-LETTER CODE, as given below, and respectfully ask our patrons to make use of same, as far as possible, when telegraphing.

### Time and Manner of Shipping.

Aback .... Express at once.  
 Abaft .... Freight at once.  
 Abash .... Express as soon as possible.  
 Abate .... Freight as soon as possible.  
 Abbey .... Answer, saying when you can ship.  
 Abeam .... Order confirmed by mail.  
 Abhor .... When will you ship order?  
 Abide .... If you cannot ship at once, advise us by wire.  
 Abode .... Customer in great hurry.  
 Abyss .... Customer will cancel if not shipped at once.

### Shipments Questions.

Abuse .... Shall we ship via rail?  
 Acorn .... Shall we ship via rail and lakes?  
 Acrid .... Shall we ship via steamer?  
 Actor .... Shall we ship via express?  
 Acute .... Shall we ship via sailing vessel?  
 Adage .... Shall we ship via cheapest route?  
 Adapt .... Shall we ship via quickest route (freight)?  
 Adder .... When will you ship?  
 Admix .... When can you ship?  
 Adult .... Can you ship us promptly?  
 Agape .... Can you ship today?  
 Agate .... Can you make shipment by the  
 Agast .... Can you ship on receipt of order?  
 Agile .... Can you furnish within  
 Agone .... When can you ship us partial shipment?  
 Aneal .... When can you make complete shipment of our order?  
 Abear .... When will you complete our order?  
 Angel .... When and how did you make shipment?  
 Anger .... Where did you make shipments?  
 Angle .... Shall we get through rate of freight?  
 Anise .... Shall we prepay freight?  
 Anise .... Shall we prepay express?  
 Ankle .... Shall we send wire tracer after shipment?  
 Annal .... Shall we cancel unfilled portion of order?  
 Annex .... Shall we hold for shipping instructions?  
 Annoy .... Shall we make partial shipment, balance later?  
 Antic .... Shall we enter order to be shipped at earliest date possible?

### Shipments Answers.

Apace .... Ship via rail.  
 Apeak .... Ship via rail and lakes.  
 Apery .... Ship via steamer.  
 Apian .... Ship via express.  
 Apish .... Ship via sailing vessel.  
 Aport .... Ship via cheapest route.  
 Appal .... Ship via quickest route (freight).  
 Apron .... We can ship  
 Aptly .... We can ship at once.  
 Araby .... We expect to ship today.  
 Ardor .... We expect to ship  
 Arear .... We expect to ship order complete  
 Areek .... We expect to make partial shipment  
 Arena .... We expect to ship balance of order  
 Argon .... We made you shipment  
 Argot .... We completed your order  
 Argue .... Shipment was made to  
 Argus .... Shipment was made by  
 Arian .... Shipment was made on  
 Ariel .... We will ship as soon as possible.  
 Arise .... We can make shipment on receipt of order.  
 Armed .... We cannot promise definitely.  
 Armor .... Impossible for us to fill your order in time specified.  
 Arose .... If ordered immediately, can ship  
 Array .... If ordered today, can ship  
 Arrow .... Will do our best to ship earlier.  
 Aside .... Will try to ship in 1 day.  
 Aspen .... Will try to ship in 2 days.  
 Aspic .... Will try to ship in 3 days.  
 Assay .... Will try to ship in 4 days.  
 Astel .... Will try to ship in 5 days.  
 Astun .... Will try to ship in 6 days.  
 Asure .... Will try to ship in 7 days.  
 Atilt .... Will try to ship in 8 days.

### Shipments Answers—Cont'd.

Atimy .... Will try to ship in 9 days.  
 Atjar .... Will try to ship in 10 days.  
 Atluk .... Will try to ship in 2 weeks.  
 Atman .... Will try to ship in 3 weeks.  
 Atoll .... Will try to ship in 4 weeks.  
 Atone .... Will try to ship in 5 weeks.  
 Attic .... Will try to ship in 6 weeks.  
 Attus .... Will try to ship in 60 days.  
 Brand .... Will try to ship tomorrow.  
 Bride .... Will try to ship in week to 10 days.  
 Beeze .... Will try to ship in 10 days to 2 weeks.  
 Booze .... Will try to ship in 2 to 3 weeks.  
 Brade .... Will try to ship in 3 to 4 weeks.  
 Broad .... Will try to ship in 4 to 5 weeks.  
 Batem .... Will try to ship in 5 to 6 weeks.  
 Brace .... Will try to ship in 6 to 8 weeks.

### Shipments Instructions.

Audit .... Please send shipping instructions.  
 Auget .... We have sent wire tracer after shipment.  
 Aunty .... Ship today sure.  
 Aural .... Ship today or cancel.  
 Auris .... Ship as soon as possible.  
 Avail .... Ship on the date specified without fail.  
 Avens .... Ship at once any portion of our order.  
 Avert .... Ship today what you have ready and balance at earliest convenience.  
 Avian .... Very urgent, rush order.  
 Aview .... Cancel our order.  
 Avoke .... Cancel balance of order.  
 Awake .... Cancel balance of order unless shipped by  
 Awful .... We are entirely out of  
 Awned .... We are urgently in need of  
 Axiom .... Send wire tracer after shipment.  
 Axmon .... Get through rate of freight.  
 Aziam .... Prepay freight.  
 Azale .... Prepay express.

### Prices.

Bacon .... At what prices can you furnish?  
 Badge .... At what price and how soon can you furnish?  
 Bafta .... Prices are subject to change without notice.  
 Baggy .... We quote you  
 Bairn .... We can not furnish  
 Baize .... Not less than  
 Baked .... Delivery in your city.  
 Baken .... Free on board at  
 Baler .... Less freight allowance per 100 pounds of  
 Balky .... Please send specifications in detail.  
 Balmy .... We cannot accept offer  
 Balsa .... You can quote  
 Basop .... We have not quoted.  
 Bater .... If necessary to meet competition, you can quote.

### Orders.

Banal .... We have entered your order for  
 Bandy .... Enter our order at prices named.  
 Banjo .... Will you accept order?  
 Banns .... We accept your order.  
 Banty .... Duplicate our order  
 Barky .... Enter our order for  
 Baron .... Send detail specifications.  
 Basal .... We cannot accept your order.  
 Basic .... Order confirmed by mail.

### Cancellations.

Badar .... We will cancel your order.  
 Babam .... We cancelled your order.  
 Babdo .... We cannot cancel your order.

### General.

Basso .... See letter of this date.  
 Baste .... Please reply immediately by telegraph.  
 Basy1 .... Your telegram is unintelligible, please repeat  
 Batam .... See at once, are in market for.

## NUMERICAL CODE.

### EXPLANATION.

There are 1,000 words listed herewith. Each word is numbered consecutively from 1 to 1,000 and each word begins with the letter "M." So that if you have occasion to use any number less than 1,000, you have merely to use the code word opposite that number.

If you wish to use a number above 1,000, use the same word except change the initial letter as follows:

- For numbers from 1001 to 2000 inclusive use the initial N instead of M.
- For numbers from 2001 to 3000 inclusive use the initial P instead of M.
- For numbers from 3001 to 4000 inclusive use the initial R instead of M.
- For numbers from 4001 to 5000 inclusive use the initial S instead of M.
- For numbers from 5001 to 6000 inclusive use the initial T instead of M.
- For numbers from 6001 to 7000 inclusive use the initial V instead of M.
- For numbers from 7001 to 8000 inclusive use the initial W instead of M.
- For numbers from 8001 to 9000 inclusive use the initial Y instead of M.
- For numbers from 9001 to 10000 inclusive use the initial Z instead of M.

This, you see, enables you to use any number between 1 and 10,000, which is as high a figure as you will likely have occasion to use.

### FOR EXAMPLE.

- For No. 1001 the word would be Nabab.
- For No. 2100 the word would be Pabuy.
- For No. 3168 the word would be Radkf.
- For No. 4444 the word would be Shaft.
- For No. 5561 the word would be Tajip.
- For No. 6650 the word would be Vakgy.
- For No. 7795 the word would be Wamug.
- For No. 8905 the word would be Yaqag.
- For No. 9999 the word would be Zaqux.

**ANALYTICAL DEPARTMENT.**

IN THE LABORATORY.

There is, perhaps, no product from metal that requires more exquisite handling from start to finish than does the Saw. We realize this fact, and in order to meet the condition, are maintaining a laboratory as complete as is possible to equip, under the care of specialists of recognized ability, training and experience.

Much of the success this Company has attained is directly due to the fact that a rigid physical, chemical and microscopical test has been maintained throughout each process of manufacture.

So thorough has been the organization in this department that we find ourselves able to do a limited amount of outside work. We offer, therefore, the same facilities that we ourselves enjoy, and have fixed a nominal rate of charge, much below that of exclusive laboratories who may have only a meager experience in this particular line.

## Atkins Circular Saws

Our long experience and knowledge of general requirements of users of saws in all sections and countries, enable us to make saws for the trade which will, as a rule, prove entirely satisfactory. The buyer should select the diameter and gauge best adapted for his work, and the kind of saw suited to his mill. The features of TEMPER and TENSION should be left entirely to the judgment of the maker. The Atkins saws seldom fail to give satisfaction in these respects, but if so, the trouble is FULLY COVERED by our warranty (see page 7).

Full stock of Saws of standard specifications are generally on hand at the home factory and branch houses, insuring as a rule, prompt service. Saws of unusual specifications have to be made to order and should therefore always be ordered as far ahead of actual requirement as possible. When sending orders please give us ALL information possible. In addition to the specifications noted, give your name, postoffice address, shipping address (if different), and state whether freight or express shipment is desired.

Each Saw is carefully tested in regard to temper and tension, and a record of all Saws are retained by us, so that we can at any time duplicate a Saw of our manufacture.

## INSTRUCTIONS FOR ORDERING CIRCULAR SAWS.

In ordering Circular Saws be careful to give following specifications in detail.

- (a) Diameter of saw in inches.
- (b) Right or left hand (see cut below.)
- (c) Gauge (thickness) of saw at center and also at rim.
- (d) Number of teeth in saw.
- (e) Style or pattern of tooth (see cut on following page.)
- (f) Diameter of mandrel hole; diameter of pin holes, and distance center to center of pin holes.
- (g) Number of revolutions of saw per minute WHILE IN CUT.
- (h) Greatest feed in inches per revolution—kind of feed.
- (i) Kind of timber sawed.
- (j) Spring or swage set.
- (k) For rip or cross-cut work.
- (l) Horse power available.

All our stock saws forty inches and larger in diameter have STANDARD mandrel and pin holes, namely—two-inch mandrel hole, and five-eighths lug pin holes, three inches from center to center. If wanted different, please send full pattern of holes. Order blanks furnished on application.

### HAND OF CIRCULAR SAWS.

**Left Hand.**

**Right Hand.**

See illustration of page 28, showing hand of shingle saws.

The above illustration represents our various styles and sizes of Saw Teeth; also our Standard Gauge. By consulting it a person will be enabled to inform us what size and style of tooth and also what thickness is desired.

Above is Stubs Standard English Gauge, used by saw manufacturers of this country.

## THE SPEED OF CIRCULAR SAWS.

This is one of the most essential things to be observed, and no one can give it too much attention. If the speed of the saw is too high, it can not do good work, besides rendering it liable to many accidents. Too high a speed generates heat in the saw, makes it touchy and limber, so that it will only run and do good work on light feed, while the teeth are in the best of order, and have keen cutting points. As soon as the teeth are dull, the saw will run or dodge whenever it comes in contact with any unusual obstacle. Again, too low a speed has its objections, but it is not attended with such ruinous effects upon the saw. These difficulties can be remedied to a limited extent by the hammering of the saw, but cannot be entirely overcome. We keep in stock Speed Indicators, with which the speed of saw mandrel can be ascertained.

We have published a pamphlet entitled "Saws and Saw Tools," containing general information relative to the care and operation of saws, which will be mailed free to any address on application.

**TABLE OF SPEED OF CIRCULAR SAWS.**

Size of Saw. Inches.	Rev. per Minute. Speed.	Size of Saw. Inches.	Rev. per Minute. Speed.	Size of Saw. Inches.	Rev. Per Minute. Speed.	Size of Saw. Inches.	Rev. per Minute. Speed.

### RULES FOR CALCULATING THE SPEED OF SAWS, PULLEYS OR DRUMS.

**PROBLEM 1.** The diameter of the driven being given, to find its number of revolutions.

**RULE**—Multiply the diameter of the driver by its number of revolutions, and divide the product by the diameter of the driven; the quotient will be the number of revolutions of the driven.

**PROBLEM 2.** The diameter and revolutions of the driver being given, to find the diameter of the driven, that shall make any given number of revolutions in the same time.

**RULE**—Multiply the diameter of the driver by its number of revolutions, and divide the product by the number of revolutions of the driven; the quotient will be its diameter.

**PROBLEM 3.** To ascertain the size of the driver.

**RULE**—Multiply the diameter of the driven by the number of revolutions you wish it to make, and divide the product by the revolutions of the driver; the quotient will be the size of the driver.

## ATKINS SOLID TOOTH CIRCULAR SAWS.

**PATENT GROUND AND TEMPERED.**

**Made from our celebrated Silver-Steel. Workmanship unequaled.**

82	5	2	640 00	43 00	9 60		
84	5	2	730 00	48 00	10 50		

All Saws of odd diameter, not listed, take price of next larger size listed.

**BONE, HORN AND IVORY SAWS.** No extra charge to be made where these Saws are more than three gauges thinner than standard. No extra charge for fitting these Saws as it is understood that the 50 per cent advance includes fitting. When these Saws are hollow ground or beveled, the 50 per cent advance is to apply only on the list price of a straight gauge saw and not to apply to the extras for hollow grinding or beveling.

No extra charge for Saws one gauge thicker than list.

No extra charge for Saws one to three gauges thinner than list; when more than three gauges thinner, add 5 per cent to list for each gauge.

Circular Saws 48 inches and larger, thinner than 10 gauge are not warranted.

Circular Saws 42 inches or less in diameter beveled one gauge without extra charge; 44 inches or larger, beveled two gauges without extra charge.

Circular Saws hollow ground or concaved, add for each gauge hollow ground or concaved double the list for beveling.

## ATKINS TOP SAWS FOR DOUBLE MILLS. SILVER STEEL.

GAUGE.	DIAMETER IN INCHES.

## ATKINS CONCAVE SAWS. SILVER-STEEL.

**Left Hand.**

**Right Hand.**

The attention of manufacturers of chair or wheelwright lumber, barrels, etc., is respectfully called to Concave Saws, of which we are manufacturing large quantities. They are dished and tempered by an entirely new and patented process, and guaranteed to be of superior quality in every respect.

Inches.	Gauge.	Price, Each.	For Each Additional Gauge, Extra.
4	16	\$2 30	\$0 05
5	16	2 40	05
6	16	2 50	05
7	15	2 90	06
8	15	3 30	08
9	15	3 80	10
10	14	4 60	12
11	14	5 40	16
12	14	6 20	20
14	13	7 60	25
16	13	9 50	30
18	12	11 30	40
20	12	14 20	50

Saws concaved to a smaller circle than 16 inches, extra price.

### Extra Sizes Made to Order.

When ordering Concave Saws, give circle to be dished to; also, which side is to be dished or concaved, right or left hand, as the saw runs toward you. (See cut.)

**ATKINS SHINGLE AND HEADING SAWS.**

**Gas Tempered. For All Makes of Machines.**

**SILVER-STEEL.**

**TAPERED AND PATENT GROUND.**

**When Ordering Shingle Saws, Give Following Specifications:**

Diameter of saw (in inches). Thickness or gauge at center. Thickness or gauge at rim. Number of teeth. Right or left hand. Speed.

If you wish us to furnish the flange, give maker's name of machine, or send full and correct templet of old flange, giving size and location of holes.

If you have flange and we are to furnish the saw only, send it to us that we may fit it to the saw, or if you can not send it, send templet of holes and sample of screw by which to drill and countersink saw.

## ATKINS SHINGLE AND HEADING SAWS.

**SILVER-STEEL, PATENT TAPER GROUND.**

**Left Hand.**

**Right Hand.**

Diameter, Inches.	Price, Each.	Diameter, Inches.	Price, Each.
30	\$32 00	46	\$85 00
32	35 00	48	100 00
34	38 00	50	115 00
36	42 00	52	135 00
38	47 00	54	155 00
40	53 00	56	175 00
42	65 00	58	195 00
44	72 00	60	215 00

Above list is for Saws beveled not more than 8 gauges, and with thickness at center of same gauge as shown in Solid Tooth Circular Saw list for Saws of same diameter, but one gauge thicker is allowed without extra charge.

For any additional thickness or beveling, add for each gauge thicker or gauge beveling as per Solid Tooth Circular Saw list.

WHEN ORDERING SHINGLE OR HEADING SAWS give the following specifications: Diameter of Saw in inches. Thickness or gauge at center and at rim. Number of teeth. Right or left hand. Speed of Saw. Name of maker of machine and size of flange.

If new flange is required, send full size template of old flange, showing size and location of all holes.

If Saw only is required, send the old flange to us to be fitted to the Saw, or if this cannot be done, send template of holes and a sample screw by which to drill and countersink Saw.

Special prices on Flanges for Trevor, Challoner and Perkins Machines quoted on application.

### COLLARS FOR SHINGLE, HEADING OR RE-SAWS.

New cast iron flanges for standard makes of Shingle Machines fitted to new Saws, \$1.50 per inch in diameter.

New steel flanges, 8 inches to 26 inches in diameter,  $\frac{3}{8}$  inch thick or less, fitted to new Saws, either with screws or rivets, \$1.00 per inch.

Flanges other than above, special price.

Fitting old flanges to new Saws, \$2.00 each, net.

## ATKINS SILVER-STEEL SEGMENT VENEER SAWS.

When ordering Segments give gauge or thickness at butt, gauge or thickness at edge, depth of bevel, diameter of saw that segments are to form, number of segments in saw, depth of segments, number of teeth in each segment, sample of screw by which to drill and countersink flat or countersunk side, and direction in which teeth run. (See engraving.)

In ordering for a flange that has been drilled, send a sheet iron or tin templet, or a correct tracing showing holes and other particulars, or one of the old segments giving the depth they originally were.

### Price Per Foot in Diameter of Saw.

Veneer Saws, 19 gauge and thinner.		Re-Saws, 18 gauge and thicker.
12 inches deep, 5 gauge.....	\$22 40	\$18 95
12 " " 6 ".....	21 40	18 10
12 " " 7 ".....	20 40	17 25
12 " " 8 ".....	19 10	16 15
12 " " 9 ".....	18 45	15 60
12 " " 10 ".....	17 80	15 00

Add 5 per cent. for each additional inch in depth.  
Deduct 5 per cent. for each inch under 12 inches in depth.

### Rates for repairing Segment Saws.

Per foot in diameter.		Per foot in diameter.	
Grinding first and second gauge.....	\$2 50	Gumming.....	\$0 80
Grinding each additional gauge.....	56	Re-toothing and Hammering.....	2 20
Hammering.....	95		

## COLLARS FOR SEGMENT VENEER AND RE-SAWS.

### Net Price for Segment Re-Saw Collar Complete.

Consisting of cast iron flange and steel rim collar fitted to segments; including screws and coppers.

Diam. Collars, Inches.	Net Prices Fitted.	Diam. Collars, Inches.	Net Prices Fitted.	Diam. Collars, Inches.	Net Prices Fitted.	Diam. Collars, Inches.	Net Prices Fitted.
14	\$17 50	20	\$25 00	26	\$36 00	32	\$52 00
16	20 00	22	28 00	28	40 00	34	60 00
18	22 50	24	32 00	30	45 00		

### Net Prices for Fitting Segments to Old Collars.

Including screws and coppers.

Diam. Collars, Inches.	Net Prices.	Diam. Collars, Inches.	Net Prices.	Diam. Collars, Inches.	Net Prices.	Diam. Collars, Inches.	Net Prices.
14	\$5 00	20	\$8 00	26	\$11 00	32	\$14 00
16	6 00	22	9 00	28	12 00	34	15 00
18	7 00	24	10 00	30	13 00		

Veneer Saw Flanges two-thirds of above prices.

When new collars of any special style different from our standard patterns are required, we charge for the pattern at actual cost; this will average from \$1.50 to \$2.50, according to the size.

Extra coppers 75 cents per dozen. Extra screws 20 cents per dozen.

**ATKINS CIRCULAR MITRE SAWS.**  
SILVER-STEEL-HOLLOW GROUND.

**Mitre Saw With Cleaner Teeth.**

**Mitre Saw.**

These saws are ground to run without set; especially adapted for smooth cutting, such as cabinet and cigar-box work. Give size of center hole, also diameter of collars or mandrel.

Size, Inches	Gauge at Holes.	Gauge at Edge of Collar	Gauge at Teeth.	Extra for Each Gauge Heavier.	Extra for Each Additional Gauge Beveling.	Price, Each.	Size, Inches	Gauge at Holes.	Gauge at Edge of Collar	Gauge at Teeth.	Extra for Each Gauge Heavier	Extra for Each Additional Gauge Beveling.	Price, Each.

11	14	17	14	16	30	7 50							

Above list includes filing teeth so that saw is ready for use.

**CIRCULAR MITRE SAW WITH CLEANER TOOTH.**

This saw can be made for either ripping or cross-cutting. When used for ripping we put in a greater number of cleaner teeth than when used for cross-cutting. It will cut equally as smooth in either ripping or cross-cutting. USE MITRE SAW LIST AS ABOVE.

**GROOVING SAWS.**

Diameter Inches	THICKNESS.								
	1/8 in.	3/16 in.	1/4 in.	5/16 in.	3/8 in.	7/16 in.	1/2 in.	5/8 in.	3/4 in.

**THE McLEAN & McKAM PATENT  
CIRCULAR SAW.**

**SILVER-STEEL.  
UNEQUALLED FOR SMOOTH SAWING.**

The demand for a saw that would cut a sufficiently smooth joint or edge to avoid the necessity of planing has been satisfactorily met in the new McLean & McKam Patent Tooth Circular Saw. It does equally good work in cross-cutting, ripping or mitreing.

This style of saw is very desirable for use in planing mills, furniture, moulding and picture frame factories and pattern shops, as the character of the work done by it is so smooth that a glue joint can be made direct from the saw. A trial is convincing proof.

**INSTRUCTIONS FOR ORDERING.**

Saws to be used exclusively for ripping or for cross-cutting should be so specified. If saws are to be used as general purpose saws both for ripping and cross-cutting, specify in ordering. For smooth work, order hollow ground saws, and specify size of collars. Saws 12 inches to 18 inches will be made hollow ground unless otherwise ordered. Saws 20 inches and over will be made straight ground and set unless otherwise ordered.

In filing these saws, file only the top of the tooth, and be careful to file the same clearance as in the saw when new. Hollow ground saws of this type are designed to run without set. Straight ground saws require much less set than ordinary saws; the set should be sprung in the tooth at least half way down the tooth, and care should be used in setting not to twist the tooth out of the plane of the saw plate.

**INSERTED TOOTH**  
**CIRCULAR SAWS**

**Atkins Chisel Bit Saws**  
**SILVER-STEEL GAS TEMPERED.**

The same kind of steel is used in our Chisel Bit plates as in our Solid Tooth Circular Saws. The Saws are tempered in the same manner and as carefully tested to guard against flaws or defects of any kind. This is a feature that, we believe, is exclusive with us and enables our Saws to receive a more accurate degree of tension and to retain it longer than any other Chisel Bit Saws on the market.

The bits are made from a SPECIALLY SELECTED STEEL manufactured expressly for our use and containing in the highest degree the qualities required in a saw tooth, namely: An exceedingly HARD but TOUGH, temper, capable of holding a cutting point for a long time, thus producing the largest possible output of lumber per set. In this respect the Atkins bits have a remarkable record.

The SHAPE of the bit is another point of superiority. Particular attention has been given to the best form of forging and grinding to give the greatest amount of wear with the best clearance and yet preserve the swage until the bit is worn out.

The HOLDERS are made from another kind of steel, also selected for the specific work required, namely: A strong spring, not easily broken, and yet hard enough to stand the wear. They are also shaped to give the maximum amount of wear, and keep the dust from crowding between the blade and the timber.

Our styles of teeth and holders are adapted to the needs of all sections. While we illustrate those which we deem the best and most in demand, we manufacture several other patterns, including those most largely used besides the styles shown.

N. B.—We manufacture, or will procure, extra teeth for all makes of saws. In ordering give number (indicating style) and gauge; or send sample. Send for circular showing styles of teeth manufactured by us. Solid Tooth Saws and Inserted Tooth Saws of any kind made over into our IMPROVED PATTERNS at reasonable prices.

28	8	30 00	33 00
30	8	34 00	37 00

Eight gauge is standard. Can furnish 9 or 10 gauge. In ordering be particular to send templet of holes.

Duplicate No. 3 teeth, list, \$4.80 per hundred. Duplicate No. 3 holders, list, 40 cents each. Wrenches, list, \$1.00 each.

## ATKINS IMPROVED PATENT INSERTED TOOTH SAW WRENCHES.

The most perfect wrench yet devised. Can be quickly adjusted to holder. Easy to operate.

**No. 1.**

For Nos. 3, 4 and 5 Holders.

**No. 2.**

For Nos. 2 and 2½ Holders.

List price, each, \$1.00.

In ordering Wrenches, specify style and number of Tooth.

## Atkins Silver-Steel Band Saws

### WITH TEETH ON ONE OR BOTH EDGES.

As pioneers in the manufacture of Band Saws, having made a SPECIALTY of this branch of saw making ever since the advent of the band mill as the modern method of manufacturing lumber, we have, by virtue of our long experience, acquired knowledge of the requirements of mill bands as to steel, temper and pattern of tooth, that has won for us an enviable reputation among users of this class of saws.

We are now enjoying the patronage of a majority of the leading band mills throughout the country. Atkins Silver-Steel Bands are producing results not obtained from other bands in the market.

Our success in this department is due to the use of Atkins Silver-Steel, the toughest and most flexible steel made, the latest improved machinery, the employment of skilled mechanics and our facilities for securing absolute uniformity of temper.

## BILGE SAWS.

Bilge Saws made to order. Prices quoted on receipt of specifications. Re-Steeling Bilge Saws, List \$60.00. Price for re-steeling includes all ordinary truing and balancing.

**GROOVER OR DADO HEAD.  
HUTHER'S PATENT.**

**Jointed and Filed, Ready for Use.**

Can be Used on any Circular Saw Mandrel

Will Cut a Perfect Groove With or Across the Grain

**Prices Net—Not Subject to Discount.**

For cutting any width groove, from  $\frac{1}{8}$  inch to 2 inches or over.

This groover consists of two outside saws, each of which is a groover in itself, and as many inside cutters as required.

The inside cutters are made  $\frac{1}{8}$ ,  $\frac{1}{8}$  and  $\frac{1}{4}$  inch thick, so that any width groove measurable in sixteenths may be cut.

The outside cutters are made  $\frac{1}{8}$  inch thick.

It will cut a perfect groove, either with or across the grain, and will not leave a rough edge, as is the case with ordinary groovers.

This tool is recommended to any person in need of a perfect groover, Dado or Gaining Head.

The outside cutters can be used singly, together, or in connection with as many or as few inside cutters as required to cut the necessary width groove.

We will guarantee to sell you the best Dado on the market, and will send on approval to any responsible party, and if not satisfactory in every respect it can be returned at our expense.

## GROOVER OR DADO HEAD.

### HUTHER'S PATENT.

The groovers are arranged in sets, as follows :

- No. 1 Set, cutting grooves,  $\frac{1}{8}$ ,  $\frac{1}{4}$ ,  $\frac{3}{8}$ .
- No. 2 " " "  $\frac{1}{8}$ ,  $\frac{1}{4}$ ,  $\frac{3}{8}$ ,  $\frac{1}{2}$ ,  $\frac{5}{8}$ .
- No. 3 " " "  $\frac{1}{8}$ ,  $\frac{1}{4}$ ,  $\frac{5}{16}$ ,  $\frac{3}{8}$ ,  $\frac{7}{16}$ ,  $\frac{1}{2}$ ,  $\frac{9}{16}$ ,  $\frac{5}{8}$ ,  $\frac{11}{16}$ ,  $\frac{3}{4}$ .
- No. 4 " " "  $\frac{1}{8}$ ,  $\frac{1}{4}$ ,  $\frac{5}{16}$ ,  $\frac{3}{8}$ ,  $\frac{7}{16}$ ,  $\frac{1}{2}$ ,  $\frac{9}{16}$ ,  $\frac{5}{8}$ ,  $\frac{11}{16}$ ,  $\frac{3}{4}$ ,  $\frac{13}{16}$ ,  $\frac{7}{8}$ ,  $\frac{15}{16}$ , 1.
- No. 5 " " "  $\frac{1}{8}$ ,  $\frac{1}{4}$ ,  $\frac{5}{16}$ ,  $\frac{3}{8}$ ,  $\frac{7}{16}$ ,  $\frac{1}{2}$ ,  $\frac{9}{16}$ ,  $\frac{5}{8}$ ,  $\frac{11}{16}$ ,  $\frac{3}{4}$ ,  $\frac{13}{16}$ ,  $\frac{7}{8}$ ,  $\frac{15}{16}$ , 1,  $1\frac{1}{16}$ ,  $1\frac{1}{8}$ ,  $1\frac{3}{8}$ ,  $1\frac{1}{4}$ ,  $1\frac{5}{16}$ ,  $1\frac{3}{8}$ ,  $1\frac{7}{16}$ ,  $1\frac{1}{2}$ .
- No. 6 " " "  $\frac{1}{8}$ ,  $\frac{1}{4}$ ,  $\frac{5}{16}$ ,  $\frac{3}{8}$ ,  $\frac{7}{16}$ ,  $\frac{1}{2}$ ,  $\frac{9}{16}$ ,  $\frac{5}{8}$ ,  $\frac{11}{16}$ ,  $\frac{3}{4}$ ,  $\frac{13}{16}$ ,  $\frac{7}{8}$ ,  $\frac{15}{16}$ , 1,  $1\frac{1}{16}$ ,  $1\frac{1}{8}$ ,  $1\frac{3}{8}$ ,  $1\frac{1}{4}$ ,  $1\frac{5}{16}$ ,  $1\frac{3}{8}$ ,  $1\frac{7}{16}$ ,  $1\frac{1}{2}$ ,  $1\frac{9}{16}$ ,  $1\frac{5}{8}$ ,  $1\frac{11}{16}$ ,  $1\frac{3}{4}$ ,  $1\frac{13}{16}$ ,  $1\frac{7}{8}$ ,  $1\frac{15}{16}$ , 2.

# Atkins Improved Hack Saws

Our greatly improved methods and increased facilities for the manufacture of Hack Saws enables us to produce blades of superior excellence in enormous quantities. We are prepared to execute orders in any size and quantity without delay, and can guarantee our blades to give entire satisfaction. We use only the highest quality of steel, made especially to our order, and our patented process of manufacture and skillful workmanship insures a greater degree of efficiency than is possible to obtain from other saws.

Our Nos. 200, 205, 210 and 215 cover the line of "Hard" Hack Saw Blades.

Nos. 400, 410, 420, 430 and 440 cover the line of Power Hack Saw Blades.

We also make special blades for Coping Saw Frames, Nos. 500 and 510.

Our Hack Saws are sold under the "AAA" brand, and any blade so marked is covered by our warranty. Samples will be furnished free of charge.

## ATKINS "AAA" HACK SAW BLADES.

### BLADES FOR HAND FRAMES.

Atkins "all hard" blades have greater durability than any similar blade on the market, owing to the fact that we use a steel which is peculiarly adapted to this service. We have also perfected a process of tempering wherein we eliminate any variation in the consistency of the blades. The teeth are sharp, and are given just enough set to insure a free, smooth and rapid cut, removing no more stock than is necessary. A file will not touch them. It will be well to remember that these Hack Saws are as hard as files. This being the case, care should be taken not to bend them unnecessarily, for, like files, they will break easily and fly to pieces when bent.

No.	Length	Width	Thickness	Teeth per Inch	List per Gross	Weight per Gross
200.....	6 inches	½-inch	.025 or 23 gauge	18	\$7 00	3½ pounds
200.....	7 inches	½-inch	.025 or 23 gauge	18	7 50	4 pounds

210.....	7 inches	½-inch	.025 or 23 gauge	24	7 50	4 pounds
210.....	8 inches	½-inch	.025 or 23 gauge	24	8 00	4½ pounds
210.....	9 inches	½-inch	.025 or 23 gauge	24	9 00	5¼ pounds
210.....	10 inches	½-inch	.025 or 23 gauge	24	10 00	5½ pounds
210.....	11 inches	½-inch	.025 or 23 gauge	24	11 00	6 pounds
210.....	12 inches	½-inch	.025 or 23 gauge	24	12 00	6½ pounds
215.....	6 inches	½-inch	.025 or 23 gauge	32	7 00	3½ pounds
215.....	7 inches	½-inch	.025 or 23 gauge	32	7 50	4 pounds
215.....	8 inches	½-inch	.025 or 23 gauge	32	8 00	4½ pounds
215.....	9 inches	½-inch	.025 or 23 gauge	32	9 00	5¼ pounds
215.....	10 inches	½-inch	.025 or 23 gauge	32	10 00	5½ pounds
215.....	11 inches	½-inch	.025 or 23 gauge	32	11 00	6 pounds
215.....	12 inches	½-inch	.025 or 23 gauge	32	12 00	6½ pounds
220.....	8 inches	½-inch	.028 or 22 gauge	14	9 00	4½ pounds
220.....	9 inches	½-inch	.028 or 22 gauge	14	9 60	5¼ pounds
220.....	10 inches	½-inch	.028 or 22 gauge	14	10 20	5½ pounds
220.....	11 inches	½-inch	.028 or 22 gauge	14	11 40	6 pounds
220.....	12 inches	½-inch	.028 or 22 gauge	14	12 60	7¼ pounds

Numbers 200, 205, 210, 215 and 220 are "all hard" blades.  
 Numbers 200, 205 and 220 for sawing solid steel, iron and bronze.  
 Number 210 for sawing solid brass, pipe and light work.  
 Number 215 for sawing thin tubing and light sheet metals.  
 All hand blades measure from hole to hole.

## ATKINS POWER HACK SAW BLADES. FOR ALL TYPES OF HACK SAW MACHINES.

Atkins power blades are all tempered hard, but by our special process the temper is graduated through the body so that just enough elasticity and life is imparted to the saw to make it far more serviceable than any other power saw on the market. They are especially adapted for use on our Kwick-Kut and all other makes of power machines.

440.....	24 inches	1-inch	.065 or 16 gauge	10	54 00	60 pounds

NOTE—12-inch blades measure from center to center of holes; 14-inch and over measure ½-inch less between center of holes than length given.

Eighteen teeth per inch can be furnished on Nos. 400, 410, 12 and 14-inch lengths only, when fine teeth are desired for sawing thin pipe, light work, etc.

For large stock, either iron or soft steel, use a coarse tooth blade; for large stock tool steel, use a medium tooth blade; for small stock tool steel, brass or bronze, use a medium or standard tooth blade; for pipe, use a medium or fine tooth blade, according to the thickness of the wall.

## ATKINS SCREW SLOTTING BLADES.

FOR HAND HACK SAW FRAMES.

Every Machine Shop has frequent occasion for cutting slots in screw heads, bolts, set screws and parts of machinery. Atkins Screw Slotting Blades are designed to perform this service easily, accurately and quickly. For convenience, we furnish the set in three thicknesses, viz: ⅛-inch, ⅜-inch and ½-inch. Blades are 8 inches long or for use in 8-inch Hand Hack Saw Frame, and are ground thin back.

The Blades are made of Special Steel, similar to that used in Atkins Circular Metal Cutting Saws. This steel is very hard, and the blades being ground thinner on the back and being toothed straight across without set, they are not apt to break easily.

No Machine Shop is complete without Atkins Screw Slotting Blades.

Packed three blades to the set in a wrapper.

List Price.....Per set, \$0 75

## ATKINS SPECIAL BLADES FOR COPING SAW FRAMES—JEWELERS' SAW.

**No. 500.** ¼-inch wide, .014-inch thick, 32 teeth to the inch.

Size, inches.....	5	6
Per gross.....	\$8 40	9 00

The 5-inch blade is made with straight ends only. The 6-inch blade with either holes or loop ends.

**No. 510.** Special Hack Saw Blade for light work. ¼-inch wide, .025-inch thick, 24 teeth to the inch.

Size, 6-inch only.....Per gross, \$9 00

This blade is made with either straight or bent ends. Both Nos. 500 and 510 are tempered hard throughout the entire blade by a new process, and drawn to a stiff spring.

## ATKINS HACK SAWS FOR SLATE.

We have perfected a special hack saw blade for cutting slate. These saws are hardened and toughened by our exclusive process.

**No. 405.** ⅝-inch wide, .028-inch thick, 14 teeth to the inch.

Size, inches.....	8	9	10	12
Per gross.....	\$9 00	10 20	11 40	12 60

## ATKIN'S IMPROVED "HOOSIER EXTENSION" HACK SAW.

**FINEST AND MOST SERVICEABLE FRAME MADE.**

Made of high-grade steel; heavily nicked, highly polished. Takes in blade from 8 inches to 12 inches, inclusive. Blade is adjustable and can be faced four different ways. Fine enameled handle. Packed one in a box.

List price, with blades, per dozen, \$12.00.

## ATKINS INDIANA HACK SAWS.

### "Indiana" Solid Steel, Adjustable.

Steel back, all nicked and polished. Blade is adjustable and can be faced four different ways. Enameled handle, fine finish.

List price, to hold 8-inch blade, complete with blade, per dozen, \$9.00.

Advance list 50 cents per inch per dozen for frames longer than 8 inches. Larger sizes to order. Packed one in a box.

## ATKINS 8-INCH IRON FRAME.

### The Best Hack Saw for the Money.

These frames are iron, black japanned, and have black wood handles. They are light in weight, graceful in appearance, but strong and rigid. The blade is held by stationary pins, which cannot be lost, and the blade can be faced four different ways. Packed ½-dozen in a box.

List price, to hold 8-inch blade, without blades, per dozen, \$4.20.

## ATKINS FLEXIBLE BACK METAL CUTTING BAND SAWS.

## Atkins Silver-Steel

The most essential feature of a Saw is the material used in the blade.

Cross-Cut Saw Steel must be hard, so as to prevent the teeth from bending or dulling easily and so they may hold their set. It must be tough so that it will withstand hard knots and obstructions. At the same time it must not be brittle, else the teeth will break off in use or in fitting.

That Steel which will measure up to these conditions to the highest degree is best adapted for Cross-Cut Saws.

### WHAT IT IS.

The formula of **Silver-Steel** is our own exclusive property and cannot be made public, but suffice it to say, it contains only the most effective and expensive ingredients. It is exceedingly close and smooth grained and while it will file easily, it will at the same time hold its keen cutting edge remarkably.

### OUR PROOF.

So carefully have we investigated the constituency of other Cross-Cut Saw Steel as compared with **Silver-Steel** and so thoroughly are we convinced of its merits that we absolutely guarantee that a **Silver-Steel Cross-Cut Saw** will hold its cutting edge one-fourth longer than any other.

### ATKINS SPECIAL STEEL.

This is a High-Grade Crucible steel fully equal to any other manufacturers best quality. For ordinary use, we recommend it in preference to any other brand. But where Saws are in constant use and the highest results are essential, we recommend our **Silver-Steel**.

### TEMPERING.

We use an exclusive process of Gas Tempering which automatically insures an absolutely uniform temper in all **Atkins Cross-Cut Saws**.

### HOW TO KNOW THEM.

Atkins Rex Nos. 1 and 2, Perfection Nos. 4 and 5, Peerless No. 3, Hemlock King No. 6, Rex Falling No. 11 and Perfection Falling No. 12 are made in **Silver-Steel only** and may be easily identified by noting the name, number and the words "**Silver-Steel**" on the blade. The balance of the line are made in both **Silver-Steel** and Special Steel and are so marked on the blade.

### WARNING.

Unprincipled merchants may endeavor to substitute Special Steel for **Silver-Steel**, or may tell you that the Special Steel is our Highest Grade. You may easily determine this fact for yourself by looking on the blade for the words "**Silver-Steel**" or "**Special Steel**" which denotes the quality of steel used in the blade.

**NOTE**—The process of Segment Grinding is described on the following page and explains why **Atkins Segment Ground Cross-Cut Saws** run easier and cut faster than any other.

## ATKINS SEGMENT GRINDING PROCESS.

We are the discoverers and sole users of the principle of segment grinding which has done more toward advancing the efficiency and speed of cross-cut saws than any other feature or features.

Segment Grinding consists of finishing the cross-cut saw blade of even gauge along the tooth edge and to a point about 1 inch above the gullets of the teeth, and from that point a TRUE TAPER to the back edge. They are not simply dubbed off on the back as some saws are. The blade is 2 gauges thinner on the back, on the ends and gradually tapers on the back toward the center, which is the thinnest point.

Atkins Segment Ground Cross-Cut Saws being thicker at the ends are stiff and do not buckle, and being thinner in the center of back, have ample clearance, enabling them to run fast and easy with very little set. The principle of Segment Grinding is best illustrated by the picture shown.

The manner in which our cross-cut teeth operate is illustrated very comprehensively below.

The cutting teeth being beveled on alternate sides and slightly longer than the rakers, cut the side of the kerf clean and true, leaving the rakers to clear the bottom. Atkins cross-cut saws produce shavings — not saw-dust.

The same principle applies to both two and four cutter teeth.

These illustrations demonstrate conclusively the reasons why Atkins cross-cut saws cut fast and easy.

**ATKINS STYLES OF CROSS-CUT TEETH.**

The following pages give a general conception of the large variety of teeth used in Atkins Cross-Cut Saws. Each pattern is designed so as to give the best results in different types of timber.

You will find not only styles similar to those you have been buying, but variations which would perhaps prove advantageous.

## TEETH USED IN ATKINS MOSS-BACK CROSS-CUT SAWS.

We manufacture the Moss-Back Blade in any of the styles of teeth shown below. This permits of a broad range and supplies every possible requirement.

The evolution of the Cross-Cut Saw for the last four hundred years to the Columbian year. Embodying all the improvements in Cross-Cut Saws; practical uniformity of thickness of the toothed edge; thin-back; hollow-back; stiff ends; hand brought down to line of cut; perforated blade; diamond tooth and clearer, segment ground; high-grade of steel; hard and tough temper; perfection in manufacture and finish; each saw warranted perfect in every respect.

The pattern of the tooth preferred is shown in the cut, but we make the saw perforated or not, with Diamond, Dexter, Victor, Lance, Tuttle Tooth with Diamond Point. A trial of the saw will convince anyone of its merits.

TRADE  
MARK

**Dixie's Favorite. For the Woods of the South It Has No Equal. Stands at the Head of the List of Easy, Fast Cutting Saws.**

**MADE IN EITHER SILVER-STEEL OR SPECIAL STEEL.**

Notwithstanding the inferior imitations of this saw placed on the market by other manufacturers, under various names, our GENUINE DEXTER has held the market, and today leads all other makes of this pattern of saw. We recommend buyers and users to refuse all imitations, and when buying Cross-Cut Saws having three cutting teeth between each set of cleaning teeth, to buy and use only those saws which have our brand, "E. C. Atkins & Co.," and trade-mark word Dexter and the picture of a horse plainly etched upon the saw.

NOTE.—All Cross-Cut Saws having three cutting teeth between two sets of rakers are imitations or infringements, except those having the brand "E. C. Atkins & Co.," and the trade-mark word Dexter and the picture of a horse.

## ATKINS ONE-MAN CROSS-CUT SAWS.

### THE CEDAR KING, No. 389.

This is the Finest One-Man Cross-Cut Saw made. The Blade is of very fine Special Crucible Steel. It will receive a sharp, keen cutting edge and retain it for a remarkable length of time. It is made and ground on the same principle as our High-Grade Hand Saws. The tooth edge is of even thickness but the blade gradually tapers to the point on the back, which is the thinnest part. This gives the blade clearance and permits the Saw to run easy and cut fast with but little set.

Specially adapted for heavy cutting, such as beams, rafters, fence posts, logs for telegraph poles and similar uses.

Skew-Back, Rex Pattern Teeth, Swaged Raker Teeth, Carved Handle, Easy Grip Pattern, Varnished Edge. Three Brass Screws and Medallion.

**List Price.**

## SILVER-STEEL ONE-MAN SAWS.

For those desiring an unusually High Grade One-Man Saw, we wish to call your attention especially to our Silver-Steel line. We are able to supply any of the One-Man Saws here shown, in Silver-Steel instead of Special Steel, and in order to introduce them thoroughly, have placed them at a much reduced list. This is only a trifling advance over the Special Steel price, and the saws will be found much superior.

## Cross-Cut Saws for the Pacific Coast

For many years we have been making a specialty of Cross-Cut Saws for use on the Pacific Coast, and we defy competition to produce saws that are as perfect as those bearing our name.

We make several patterns suitable for different localities and the peculiar nature of the various timbers—these patterns being the result of years of constant study to please the users with saws that will cut rapidly and run with ease. Our vast growing trade on this line of saws on the Coast is sufficient evidence of the superiority of our goods.

We respectfully solicit trade on these saws, either direct or through our several jobbing agencies, located in all the principal cities of the Coast. We carry a full line at our Pacific Coast Branches, at Portland, Oregon; San Francisco, California, and Seattle, Washington, where orders may be sent for prompt execution.

We call attention to some of our leading patterns of teeth:

**Occident,  
Dexter,  
Star of the West,  
Pacific Star,  
Diamond,**

**Eureka,  
Pacifico,  
Lance,  
Perfection,  
Worden,**

**Tyee,  
Howatson,  
Clincher,  
Redwood King,  
Eureka Falling.**

**STYLES OF TEETH  
ATKINS CROSS-CUT SAWS  
FOR  
PACIFIC COAST.**

We manufacture a special line of Cross-Cut Saws for use on the Pacific Coast. They are admirably adapted to the needs of this territory, made in extra long lengths, toothed to the end and will be found "The Finest on Earth."

ATKINS  
PACIFIC COAST PATTERNS.

**ATKINS CELEBRATED DEXTER, No. 259.**

**SPECIAL PACIFIC COAST PATTERNS.**

The patent by which this Saw is protected consists of a depression of the face of the cutting teeth through the center from point to base, thus removing all friction while in use, giving strength and stiffness to the teeth, and increasing threefold the durability of the "set." This Saw never fails to give the best of satisfaction.

**List Prices, Without Handles.**

ATKINS AUCKLAND PATTERNS.

We wish to call special attention to our Auckland Pattern of Cross-Cut Saws. The peculiar styles of teeth shown are the result of very careful study as to the best construction for different woods indigenous to New Zealand.

They are made of a very high-grade of Special Crucible Steel and Gas Tempered by our exclusive process; will retain their cutting edge remarkably.

Please note the wide range of styles of teeth shown and the minute variation in specifications, enabling the buyer to secure Cross-Cut Saws which will meet his requirements to a nicety.

Space of teeth, 6 to 7½ feet, 1-inch; 8 to 10 feet, 1¼ inches. Space between sections of teeth, 2¼ inches.

**ATKINS  
PATENT CROSS-CUT SAW HANDLES.**

**No. 1. Loop Handle.**

Made of specially selected air-dried, straight grain hardwood stock. Socket and washer of extra high-grade cast steel. Loop of extra heavy, high tensile strength steel, spot electric welded. Packed 50 pairs in case, weighing 130 pounds.

List price, per pair, 36c.

**No. 2. Reversible Handle.**

Illustration shows handle reversed. Made of carefully selected air-dried, straight grain hardwood stock. A very strong, quick adjusting handle. All malleable iron. Packed 50 pairs in barrel, weighing 135 pounds.

List price, per pair, 30c.

**No. 3. Loop Handle.**

Made of strictly selected hardwood stock, air-dried and seasoned. Malleable iron, patent swivel socket. Bolt made of high tensile strength, cold drawn steel, spot electric welded. Packed 50 pairs in case, weighing 115 pounds.

List price, per pair, 24c.

**No. 4.**

**Dexter Handle-Reversible.**

This is known as the Dexter Pattern. The wood parts are made from selected hardwood, thoroughly seasoned and finished. Extra heavy. All malleable iron. Packed 75 pairs in barrel, weighing 165 pounds.

List price, per pair, 30c.

## ATKINS PATENT CROSS-CUT SAW HANDLES.

**No. 5. Bracket Loop Handle.**

This handle is made of specially selected hardwood, air-dried and seasoned. Extra strong malleable iron bracket. Loop of high tensile strength cold drawn steel, spot electric welded. Packed 50 pairs in barrel, weighing 135 pounds.

List price, per pair, 30c.

**No. 6 Loop Handle.**

Made of heavy stock, carefully selected, air-dried and seasoned. Cast steel patent swivel socket. Loop of extra heavy, high tensile strength, cold drawn steel, spot electric welded. Packed 150 pairs in barrel, weighing 200 pounds.

List price, per pair, 16c.

**No. 7. Reversible Handle.**

Selected, thoroughly seasoned hardwood stock. Cast steel washer and clasp. Extra high-grade malleable bolt and wing nut. Our exclusive pattern. Packed 100 pairs in barrel, weighing 160 pounds.

List price, per pair, 15c.

**No. 8. Loop Handle.**

Made of specially selected, thoroughly seasoned hardwood stock. Socket and washer of extra high-grade cast steel. Loop of extra heavy, high tensile strength steel, spot electric welded. Packed 100 pairs in barrel, weighing 200 pounds.

List price, per pair, 20c.

**ATKINS  
PATENT CROSS-CUT SAW HANDLES.**

**No. 9. Bracket Handle—Reversible.**

This handle is of specially selected, air-dried and seasoned stock. Extra strong malleable iron bracket. Loop same as No. 5. Packed 50 pairs in barrel, weighing 135 pounds.

List price, per pair, 30c.

**No. 10. Loop Handle.**

Made of selected hardwood stock. Cast steel socket and washer. Loop of high tensile strength, cold drawn steel, spot electric welded. Packed 150 pairs in barrel, weighing 200 pounds.

List price, per pair, 14c.

**No. 11. Reversible Handle.**

This is known as the Climax Pattern. It is made of thoroughly seasoned selected stock. Extra heavy cast steel clasp and washer. High-grade malleable iron bolt, with lock rivet feature preventing rivet from being detached. Packed 75 pairs in barrel, weighing 140 pounds.

List price, per pair, 15c.

**No. 12. Loop Handle.**

A strictly high-grade handle, containing special features found in no other. It is impossible to break it through screwing the handle. Made of extra carefully selected hardwood stock, air-dried and seasoned. The socket, washer and nut of extra high-grade malleable iron. Loop extra heavy, of high tensile strength, cold drawn steel, spot electric welded. Packed 50 pairs in case, weighing 125 pounds.

List price, per pair, 40c.

## ATKINS PATENT CROSS-CUT SAW HANDLES.

**No. 13X.**

Made of strictly high-grade, carefully selected hardwood stock. Cast steel socket with specially hardened face or bearing part on saw. Has no glued up plug. Loop of high tensile strength, cold drawn steel, spot electric welded. Packed 50 pairs in case, weighing 80 pounds. List price, per pair, 30c.

**No. 14. Reversible Handle.**

Specially adapted to the Pacific Coast. Clasp and washer made of extra strong high-grade malleable iron. Fitted with machine turned steel bolt, with special rivet feature enabling quick action in removing from saw. Packed 50 pairs in case, weighing 175 pounds.

List price, per pair, \$1.00.

**No. 15. Reversible Handle.**

Another popular Pacific Coast pattern. Closed guards. Clasp, standard and washer of extra heavy malleable iron. Special ratchet adjustment for sawing at any angle. Machine turned steel bolt. Packed 50 pairs in case, weighing 195 pounds.

List price, per pair, \$1.00.

**No. 16. Loop Handle.**

A very popular, light-weight pattern made of carefully selected stock, malleable iron cuff and loop. Fitted with right and left hand threads, saving time in adjustment. Wooden parts not weakened by boring. Packed 50 pairs in case, weighing 140 pounds.

List price, per pair, 50c.

**No. 17. Loop Handle.** Same style as No. 16, heavy pattern. Packed 50 pairs in case, weighing 140 lbs. List price, per pair, 55c.

**ATKINS  
PATENT CROSS-CUT SAW HANDLES.**

**No. 20. Loop Handle.**

This is a very strong, light handle. Made of specially selected air-dried and seasoned stock. The socket is of highest grade ferrule steel with a patented swivel feature adding to the ease of adjustment. The loop is of extra heavy high tensile strength, cold drawn steel, spot electric welded. Packed 50 pairs in case, weighing 100 pounds.

List price, per pair, 36c.

**No. 21. Reversible Handle.**

Climax Pattern, similar to No. 11, but lighter weight. Made of thoroughly seasoned selected stock. Extra heavy cast steel clasp and washer. High-grade malleable iron bolt with lock rivet feature which prevents rivet from becoming detached. Packed 75 pairs in barrel, weighing 140 pounds.

List price, per pair, 14c.

**No. 22. Reversible Handle.**

This is one of the most popular handles on the market. Extra strong and heavy and easy of adjustment. Climax pattern. Specially selected air-dried stock. Extra high grade malleable clasp and washer. Heavy machine turned steel bolt  $3\frac{1}{2}$  long and  $\frac{3}{8}$  thick with a special rivet feature allowing quick action in removing from the saw. Packed 50 pairs in case, weighing 100 lbs.

List price, per pair, 55c.

**No. 25. Swivel Handle.**

An extra strong handle, reinforced by heavy machine steel bolt running through the entire center. Socket, washer and loop of extra heavy, high-grade malleable iron. The stock is of carefully selected, thoroughly dried hardwood. Packed 50 pairs in case, weighing 175 pounds.

List price, per pair, 36c.

## ATKINS PATENT CROSS-CUT SAW HANDLES.

**No. 26. Loop Handle.**

Made of good quality hardwood thoroughly seasoned. The socket is of high-grade malleable iron. The loop of extra heavy high tensile strength, cold drawn steel, spot electric welded. Mechanically, we believe this to be the most practical swivel handle on the market. Packed 100 pairs in barrel, weighing 175 pounds.

List price, per pair, 24c.

**No. 108. Loop Handle.**

For description of this handle, see Loop Handle No. 8. This is a very fancy, highly finished handle, 12 inches long, varnished and polished. The loop is tinned and the washer and ferrule black baked Japan. Packed 50 pairs in case, weighing 130 pounds.

List price, per pair, 27c.

**No. 111. Reversible Handle.**

This handle is similar in construction to the No. 11, but is very highly finished. The handle is 15¼ inches long, carved, varnished and polished. The clasp and washer are baked black Japan. The bolt and wing nut are tinned. Packed 50 pairs in case, weighing 110 pounds.

List price, per pair, 22c.

**One Man Saw Handle, No. 2.**

This is made of carefully selected hardwood, thoroughly seasoned and dried. Varnished edge, well finished. Easy grip pattern. Saw screws extra.

List price, per dozen, \$3.00.

**Supplementary Handle for  
One Man Saws.**

Made of thoroughly seasoned, air-dried hardwood stock. Socket and washer of high-grade ferrule steel. Malleable iron bolt with locked rivet feature, preventing rivet from becoming detached.

List price, per dozen handles, \$1.75.

# Atkins Saw Tools

As in everything else that we manufacture, we have taken the lead in making Tools suitable for fitting Cross-Cut, Hand and other Saws in a proper manner, so that they will do satisfactory work. So marked has been our success in the tool line that within the last few years several manufacturers have been trying to beguile the trade with base imitations, claiming that their tools would do the work "as well as the 'ATKINS.'"

We refer particularly to our:

"EXCELSIOR,"

"PERFECTION,"

"IDEAL,"

"LEADER," ,

"DEXTER" AND

"CRITERION"

Tools, as illustrated in the following pages. These tools are all made under letters patent, and are of highest grade material and workmanship. We guarantee that there is nothing else on the market that can equal them for efficiency in rapid and correct work.

We invite the careful attention and scrutiny of the trade to this subject, believing that it will be found, by comparing our tools with any of the imitation tools, that there will be no question in the minds of every one as to the superiority of the ATKINS Tools.

## ATKINS PERFECTION SAW TOOLS.

**The Perfection Saw Tool.**

The Perfection set of tools comprises a combined Jointer, Raker Tooth Gauge and Side File, Tooth Set Gauge, a No. 1 Criterion Saw Set and a fine Steel Hammer specially adapted to use with the Criterion Set. The Combined Jointer, Raker Tooth Gauge, Side File and No. 1 Criterion Set, makes the most complete set of Saw Tools ever offered to the public. It is Perfection.

Price, per dozen sets, \$15.00.

**Raker Gauge.**

**Tooth Set Gauge.**

**Side File.**

**Jointer.**

**No. 1 Criterion Saw Set.**

**Hammer.**

## ATKINS IDEAL SAW TOOLS.

It is a well known fact that in order to secure the best service, each tooth as well as each raker of a Cross-Cut Saw, should be absolutely uniform.

This raker has quite as much to do with the proper performance of the Saw as have the cutting teeth. In order to enable the filer to turn out a Saw as perfect as new, we have devised our IDEAL SAW TOOLS.

By the use of the tool as a Jointer, Raker Tooth Gauge or Side File there can be no variation in the teeth, and the advantage of a Setting Anvil that will operate without removing the Saw from its clamps or vise is apparent. We believe these to be the most practical tools on the market and recommend them in the highest terms.

**Atkins Ideal Saw Tool.**

**Jointer.**

**Raker Tooth Gauge.**

**Side File.**

**Raker Swage.**

**Pistol Grip Anvil.**

**Price, list, \$15.50 per Dozen.**

## ATKINS NICKEL-PLATED EXCELSIOR SAW TOOLS.

This is a new and strictly high-grade fancy outfit. The Tools are similar in construction to the No. 2 Excelsior, shown on preceding page, but very finely finished and nickel-plated (not polished nor buffed.)

The set consists of a Combination Jointer, Raker Tooth Gauge and Side File, a Setting Block and Set Gauge. These are packed in a very attractive INDIVIDUAL BOX, COVERED WITH FANCY PAPER AND A BEAUTIFULLY LITHOGRAPHED LABEL IN BLUE, RED, YELLOW AND GOLD.

They are ready and easy sellers because attractive in appearance and price and at the same time most effective tools.

**Combination Jointer, Gauge  
and Side File.**

**Tooth Set Gauge.**

**Setting Block.**

**The Beautiful, Attractive Package.**

List price, per dozen, \$9.00.

## ATKINS PATENT EXCELSIOR SAW TOOLS No. 1.

WITH IMPROVED PATTERN SET BLOCK.

OVER A MILLION SETS SOLD.

This set of tools comprises a combined Jointer, Raker Tooth Gauge and Side File, a patented Channeling Set Block and a Set Gauge. The No. 1 Excelsior Tool differs from the No. 2 only in the Setting Block, the Improved Channeling Set Block being included with the No. 1, and the Original Pattern Set Block with the No. 2.

Put up one set complete in a neat paste-board box with full directions for use.

List price, per dozen, \$7.00.

Atkins Excelsior Saw Tool No. 1.

Side File.

Tooth Set Gauge.

Jointer.

Raker Gauge.

Channeling Set Block.

## ATKINS PATENT EXCELSIOR SAW TOOLS No. 1.

### DIRECTIONS FOR USE.

In fitting a saw, the teeth should first be jointed, or made uniform in length. To accomplish this, place a nine-inch file in the Jointer, as shown in cut, and by means of the large screw, spring it to suit the curve of the saw, and pass it lightly over the points of the teeth until it touches the shortest tooth; then place the tooth gauge over the cleaner drag teeth, as indicated in cut, and file them down to the gauge. Now, if the saw requires setting, lay the setting block on a log with a place leveled to receive it, or end of a block of wood, and lay the saw upon the setting block so that the point of the tooth to be set projects over the apex of the beveled surface fully one-quarter of an inch, bringing the point of tooth to the position as shown in the cut.

**Tooth Set Gauge.**

The tooth being in position, give two or three strokes with a light hammer on the sides of the tooth, over the apex, fully one-quarter of an inch from the point, which will usually give the required set. Then move tooth forward over the bevel or Channeling Block, and strike the tooth a sharp blow directly over the point. This will make a slight depression below the point of the tooth, which serves to keep the cutting edges flush, thus giving them greater cutting power and relieves the pressure on back of the tooth. Regulate the set by gauging each tooth with the tooth-

gauge; take it in the left hand and place it against the side of the saw. (See cut.) The point on the short end indicates the least set, and the point on long end indicates a little more set. The side file should be used to remove any feather-edge or burr left in filing, and even the set perfectly. This can be done when the saw is in the vise or filing clamp. Place an eight-inch mill bastard file in the recess on the side file; tighten the screws holding the file. Be particular that the saw is placed firmly in the clamp. Pass the center of the file lightly against the teeth until the burr is removed and the set evened up. Care should be exercised not to use the side file more than is necessary to remove the feather-edge and even up the set.

The wrench may be used to lessen the set if necessary, but should never be used to set the teeth. This should be done only with a hammer upon the setting block, or any hard and slightly beveled surface.

Notice carefully the manner in which the saw is filed when new, and file nearly as possible in the same manner.

To secure the best results, our Diamond Tooth (both Silver-Steel and Special Steel) and Dexter Saws should be sharpened after being set.

**ATKINS  
PATENT EXCELSIOR SAW TOOLS No. 2.  
WITH ORIGINAL PATTERN SET BLOCK.**

This set of tools comprises the best quality combined Jointer, Raker Tooth Gauge and Side File, nicely finished and made true and correct in every particular, in every way the same as furnished with No. 1 Excelsior. It also includes a plain, but good quality of Set Block, together with Set Gauge. The only difference between the No. 1 and No. 2 Excelsior Saw Tools is in the Set Block, which is slightly cheaper in the No. 2 Combination.

Put up one set complete in neat pasteboard box with full directions for use.

List price, \$6.50 per dozen.

**Atkins Excelsior Saw Tool No. 2.**

**Jointer.**

**Tooth Set Gauge.**

**Side File.**

**Raker Gauge.**

**Setting Block.**

## ATKINS EXCELSIOR SAW TOOL No. 5.

The No. 5 is a marked improvement over any other device designed for similar use.

The special feature in connection with this tool is the

### EXTRA HARD TOOL STEEL BAR

Used for jointing, which overcomes the possibility of the teeth wearing A GROOVE ON THE UNDERSIDE of the bar, as is inevitable with others.

**Side File.**

**Jointer.**

**Raker Gauge.**

**Tooth Set Gauge.**

**Channeling Set Block.**

The set comprises a combination Side File, Jointer, Tooth Gauge, a Setting Block and a Set Gauge. Through its use it is a simple matter to file each cutting point and raker tooth to an exactly proper and uniform point. The Set Gauge regulates the degree of set to be given each cutting point for different classes of timber. The Setting Block enables the user to safely set the teeth of very high tempered saws with safety. Atkins Excelsior Tool No. 5 is adapted for any style of Diamond Point Saws and is especially desirable for use in fitting Atkins High-Grade Silver-Steel Rex and Perfection. Directions for using, same as Excelsior No. 1, see page 118.

List Price, per dozen, \$8.50.

## ATKINS "REX" COMBINED SAW TOOL.

This saw tool combines a jointer, slotted plate for adjusting the length of the raker teeth and a gauge for adjusting the swage of the raker teeth in cross-cut saws.

**Atkins "Rex" Combined Saw Tool.**

### DIRECTIONS FOR USE.

In fitting the saws the teeth should first be jointed or made uniform in length. To accomplish this place a 9-inch file in the jointer as shown in the cut and by means of the screw tighten the file in place and pass it lightly over the points of the teeth until it touches the shortest tooth. If the cleaner or drag teeth are to be shortened, place the tooth gauge over the cleaner or drag teeth as indicated in the cut and file them down to the gauge, afterward filing them squarely across to a point as desired. If it is desired merely to swage the point of the rakers this may be done with a light blow of the hammer on the extreme point of the raker teeth, (though for this purpose we strongly recommend our Raker Tooth Swage, a very simple, cheap, but effective device) and the relative position of this point may be accurately gauged by the application of the swaging gauge as shown in the cut.

**Adjustment for Shortening Rakers.**

**Joining the Teeth.**

The sides of this tool, to which are fastened two pieces of hardened steel, make a very satisfactory straight edge to determine the relative position of the points of the various cutting teeth.

**Gauging the Swaged Rakers.**

List price, per dozen, \$12.00.  
Put up in a neat cardboard box.

## ATKINS PATENT LEADER SAW TOOLS.

This set consists of our new "Leader" Combined Jointer, Raker Tooth Gauge and Side File; in connection with the Setting Block and Set Gauge, the same as in our well-known Excelsior Set No. 1. The features of the combined tool, although somewhat different from the Excelsior, are easily understood and the same instructions will apply to both.

Put up one set complete in a neat pasteboard box, with full directions for use.

List, per dozen, \$6.00.

**Atkins Leader Saw Tool.**

**Jointer.**

**Tooth Set Gauge.**

**Side File.**

**Raker Gauge.**

**Setting Block.**

## ATKINS DEXTER SAW TOOLS.

(Patented December 3, 1889.)

**Raker Tooth Gauge, Jointer and Side File Combined in One Tool.**

Price, per dozen, \$4.00.

### TO JOIN THE TEETH.

In filing a saw the teeth should first be jointed and made uniform in length. To accomplish this place an 8-inch mill bastard file in the Jointer, as shown in the cut; the file being held firmly in place by use of the thumbscrew, which will spring the file to suit the curve of the saw. Pass the file lightly over the point of the teeth until it touches the shortest tooth.

### TO GAUGE THE RAKERS.

The gauge plate is made adjustable, and can be set to point the Raker for hard or soft wood. Place the tooth gauge over the clearer drag teeth, as indicated in cut and file them down to the gauge.

**Dexter Saw Tool.**

### TO SET THE TEETH.

Fine, high-tempered Cross-Cut Saws should never be set with a spring set. A beveled Setting Block, or better, the Atkins Criterion Saw Set, with a light hammer, should be used. If Setting Block is used, lay the saw upon the Setting Block so that the point of the tooth to be set projects over the apex of the beveled surface fully one-quarter of an inch. The tooth being in position, give two or three strokes with a light hammer over the apex, fully one-quarter of an inch from the point, which will usually give the required set.

**Jointer.**

**Raker Gauge.**

### TO SIDE FILE.

The Side File should be used to remove any uneven edge or burr left in filing, and even the set perfectly. This can be done when the saw is in the vise or filing clamp. Place an 8-inch mill bastard file in the recess of the Side File (see cut,) the file being held firmly in place by use of the thumb-screw. Pass the center of the file lightly against the tooth until the burr is removed and the set evened up. Care should be exercised not to use the Side File more than is necessary to remove the feather edge and even up the set.

**Side File.**

N. B. Notice carefully the manner in which the saw is filed when new, and file as nearly as possible in the same manner.

## ATKINS IMPROVED CRITERION SAW SET

Price, per dozen, \$8.00.

**For All Kinds of Cross-Cut, Hand, Wood  
and Other Small Saws.**

The only proper way to set these saws is with a hammer set.

The Criterion Set has a die which rests on the tooth; the die being struck instead of striking the tooth itself with the hammer. This imparts a more even set and removes the liability of breakage.

The Improved Criterion Set has a pointed die adapting it to any size of tooth.

The Criterion Set is adjustable, so that any desired degree of set may be secured.

The Criterion Saw Set is made of best refined malleable iron, lacquered a rich brown. The die and anvil are drop-forged from the finest tool steel and properly hardened. The set is fully warranted.

## HAMMERS FOR SETTING SAWS.

**Special Slotted Hammer, used often in setting saws.**

Both the above are of very fine tool steel, handsomely finished, handles of carefully selected hardwood.

Price, per dozen, \$3.50.

**ATKINS AAA SAW SET No. 4.**

**FOR CROSS-CUT SAWS.**

The action of this device is clearly shown in the above illustration. The hammer blow reaching the tooth through the plunger prevents the likelihood of breaking the saw teeth. The amount of set may be regulated by moving the top slide. Absolute uniformity is assured as well as maximum speed. Given the amount of bevel, and the slide may be instantly set to proper position, when by simply placing the tool over the point of the tooth and striking the plunger one blow, a perfectly uniform set, located properly on the tooth, is secured.

Made of fine crucible steel, handsomely finished, and packed one-half dozen in a box.

List price, per dozen, \$18.00.

**ATKINS AAA SAW SET No. 5.**

**FOR HAND SAWS.**

The above device operates on the same principle as the No. 4, the amount of set being regulated by moving the guide on the front up or down. Its advantages are obvious and it not only prevents the breaking of the saw teeth, but assures an absolute uniform set, precluding the possibility of setting the teeth too far down on the blade. After setting each alternate tooth the saw is reversed, thus enabling the operator to complete the process without changing the position of the set.

List price, per dozen, \$18.00.

## ATKINS CRITERION BAND SAW SET.

Price, per dozen, \$10.00.

This set is admirably adapted for setting Narrow Band Saws, Carpenters' Rip Saws and any saw having teeth of similar shape. The illustration shows the method of using the set, which is very simple. Hold saw firmly against the gauge, as shown; strike the point of every alternate tooth with a light hammer. Reverse the saw, placing it against the other side of the gauge, and set the remaining teeth.

The Criterion Band Saw Set is made of the best refined malleable iron, lacquered a rich brown. The die and anvil are drop forged from the finest tool steel and properly hardened. The set is fully warranted.

## ATKINS CHANNELING SET BLOCK.

The above illustration represents our latest improved form of set blocks, and is used for setting and channeling the cutting teeth of Cross-Cut Saws, thereby producing a more durable set, and relieving the friction on the side of the teeth.

One of these set blocks is included with each set of our "Excelsior" No. 1, and "Leader" tools.

Regular quality, chilled iron .....	Per dozen, \$3 00
Old style set block .....	" 3 00

## ATKINS TOOTH AND RAKER GAUGE.

FOR REGULATING THE LENGTH OF CLEARERS AND THE WIDTH OF THE SET IN CROSS-CUT SAWS.

**Users of Cross-Cut Saws Will Find This Tool Indispensable.**

Price, Single Gauge, per dozen, 80 cents.

The cleaning teeth of all saws should be somewhat shorter than the cutting teeth, and although shortened, should be of uniform length throughout. The flange of the Gauge rests on the points of the cutting teeth, the cleaning teeth projecting through the opening in the center of Gauge. Reduce the projecting points by means of a file until arrested by the edge of Gauge, which cannot be cut with a file. Thus tooth after tooth can be rapidly and correctly reduced to an even length by any unskilled operator.

Our Single Gauge regulates the cleaners for hard wood, and our Double Gauge for both hard and soft wood. One end of the straight-edge of these Gauges has been slightly beveled, so that they may be used for gauging the set, as shown in cut.

**Gauging the Set.**

Price, Double Gauge, per dozen, \$1.20.

## ATKINS LEVER SAW SET.

No. 1.

For Hand, Rip, Panel and all small saws, per dozen, \$8.00.

## ATKINS PATENT RAKER SWAGE.

### For Swaging Raker Teeth of Cross-Cut Saws.

Many practical filers and users of cross-cut saws have adopted this plan of swaging or turning the points of the rakers slightly outward instead of jointing or filing them shorter. This leaves the raker with a little hook-like point, which clears out the kerf much more perfectly, producing long shavings instead of fine saw dust, thus enabling the sawyers to do a greater amount of work in a given time.

This has been accomplished by striking the point of the raker a light blow with the setting hammer, but there is danger of this point breaking off unless the temper is rather mild, and especially in winter when saws are sometimes fitted without warming. There is also a liability to turn one point more than the other, which prevents the best results.

To overcome these objections, the Raker Swage, shown in the accompanying illustration, has been devised by a practical sawyer, and has been heartily endorsed by all who have seen and used it. By its use the work is SAFELY and ACCURATELY done and in much less time than otherwise. The construction is so simple that no description is required. It is made of FINE TOOL STEEL, hardened to stand the wear, and will swage the rakers of any cross-cut saw.

Price, per dozen, \$3.00.

**ATKINS "PERFECT" SAW SET AND  
VISE COMBINED.**

**IT CAN BE ADJUSTED INSTANTLY TO THE DIFFERENT  
OPERATIONS.**

Cut shows the filing clamp ready for use. Jaws are rubber-cushioned. Practically noiseless. Can be tilted to any desired angle. Works on the lock lever principle. Fastened to bench with malleable iron screw clamp. Simple, strong, durable and easy to operate.

Same Tool adjusted for use as a Saw Set.

List price, each, \$6.00.

## ATKINS "PERFECT" SAW SET.

This device is so constructed that a uniform blow can be given to each tooth, thus insuring a perfectly even set throughout the blade. No danger of breaking the points of the most highly-tempered saw, even when operated by a novice. It is adjustable to any amount of set desired, and will set the finest, as well as the coarsest, tooth perfectly.

List price, \$3.50 each.

## THE ATKINS HAND SAW FILER.

This saw-filing device is the most perfect tool for the purpose ever produced. By following the directions accompanying each filer a ten-year-old boy can file a saw correctly, bringing each tooth to the same bevel and pitch. It can be used with wood clamp in any ordinary vise or with iron saw clamp.

List price, per dozen, \$24.00.

## ATKINS NOISELESS SAW VISE.

**The Latest and Best. Rubber Cushioned Jaws. Strong and Durable, Heavily Japanned and Well Finished.**

(Invented by Chas. Ralston Walter.)

In general appearance the new Atkins Saw Vise is very similar to those of other well-known makes, but, while combining the merits and good points of all the old style patterns, it has many new features and advantages not incorporated in any of the others. All the weak points in other vises were carefully noted and overcome in the new Atkins. It is simple and neat, and will readily attract favorable attention from mechanics everywhere.

All the wearing parts are re-inforced. It is made of the best material and finely finished. Also has rubber cushions in the jaws to prevent the disagreeable noise. Will make no more noise than if filing a solid piece of iron.

The Vise operates with the lock lever principle and there is no chance of overstraining it, as is the case in others where the screw is used. The jaws are made to open and close by simply pushing same forward and back.

One of the most desirable features is the ease with which the saw can be gauged or adjusted with both hands (see cut of No. 3 A,) so that the teeth will be just the right height above the face of the jaws and the Vise instantly tightened without removing the hands.

Another good point—the Vise is set so low down on the bench that there is no leverage to cause vibration and in consequence is very rigid.

## THE ATKINS 1 AA SAW VISE.

**With 11-Inch Jaw.**

Has a malleable iron screw clamp for attaching to work bench, and can be readily detached and carried from place to place.

List price, per dozen, \$16.00.

## ATKINS NOISELESS SAW VISE.

### ATKINS 1A SAW VISE.

With 11-Inch Jaw.

Can easily be screwed to work bench or any place desired.

List price, per dozen, \$13.00.

### ATKINS 2A SAW VISE.

With 15-Inch Jaw.

Made to screw to work bench. Same style as No. 1A except jaw is longer.

List price, per dozen, \$15.00.

### ATKINS 3A SAW VISE.

With 11-Inch Jaw.

Fastened to bench with a malleable iron screw clamp. Readily detachable. Jaws are adjustable and can be tilted to any desired angle.

List price, per dozen, \$18.00.

**ATKINS "AAA" HAND SAW CLAMP.**

Patented May 21, 1907.

This Clamp weighs a little over one pound and will occupy about as much room as a chisel, and may be conveniently carried in any kit.

It may be attached to any square edge for immediate use, and instantly and easily detached.

It can be used for either jointing, setting or filing, and the saw being seated close to its work does not quiver and needs no wooden prop.

The advantages will be immediately apparent to all users of Saw Vises who have heretofore been obliged to carry with them a large, heavy, ungainly contrivance that was after all not as effective as the "AAA" Clamp. Nor has there been any device heretofore offered that was so easily attached to, or detached from any convenient bench or saw horse.

By referring to the above illustration, you will note that the saw is placed in the clamp with the tooth edge upward for filing only, all parts and teeth being easily accessible. For jointing and setting, the vise may be reversed by simply turning the arches at either end and placing the blade in the clamp back downward.

The Atkins "AAA" Saw Clamp sells at a popular price, and the advantages over any previous vise or clamp are so apparent that the user will recognize them immediately.

Packed three in a box.

## Atkins Wood Saws

A glance through the following pages, showing our line of Wood Saws, Blades and Frames, will convince you of the unusually complete and varied assortments and combinations which we offer.

We are showing thirteen styles of Frames alone, and forty-two different Blades.

We make any combination of Frame or Blade desired. No. 100 Frame, for instance, is shown in combination with No. 1 Blade, making complete Saw No. 101. You may, however, buy any other style of Blade in connection with No. 100 Frame if desired.

No. 200 Frame is shown in combination with No. 2 Blade, making complete Saw No. 202. Frame No. 300 with the Blade No. 2 becomes No. 302, and so on.

Each Frame can thus be used in connection with any of our forty-two Blades, making a combination of that number of different saws for each style of Blade.

Our Blades are classified as "A," "B," "C" and "D." "A" grade is our very highest quality, Silver-Steel, and "D" our cheapest quality of steel.

We are giving this department careful consideration and are offering the finest line of Wood Saws on the market.

**ATKINS  
INDIVIDUAL WOOD SAW BOXES.**

Without extra charge, all Atkins Silver-Steel Wood Saws will hereafter be packed in individual boxes. This covers all Saws equipped with blades listed under classes A and B.

These boxes are 7 inches wide, 1-inch high and either 30 or 32 inches long, according to the size of the blade. They are made of a heavily coated manila stock, with patent fastenings in the ends for security, and a very handsome colored label is used on the top and sides. This makes a very attractive shelf package.

We are adding this extra cost because we believe that a package of this nature will be highly appreciated by both the dealer and consumer, and that through its use the already heavy demand for Atkins High-Grade Wood Saws will be increased.

The advantages of this package are obvious.

It not only converts a formerly unsightly piece of stock into a handsome piece of "shelf goods," but keeps the contents fresh and clean.

As each box is carefully numbered on the top and sides, any particular Saw desired may be immediately identified and easily wrapped for delivery.

No. 42. Tuttle Tooth. (Straight, 2 inches wide.)

## Atkins Hand, Panel and Rip Saws

The wonderful growth of our business in hand and small saws has been noted and remarked upon from all quarters. The secret of our success in this Department is on account of the high quality of the saws.

This quality is based upon the use of our celebrated SILVER-STEEL which enables the saw to take a high, tough temper, which, together with the finest grade of grinding, finish and workmanship throughout, makes them the finest saws on the market.

The following numbers are our leaders :

- Nos. 51, 54, 55. SILVER-STEEL, Damaskeen finish.
- Nos. 53 and 65. SILVER-STEEL, Perfection handle, Damaskeen finish.
- Nos. 66 and 67. SILVER-STEEL, Mirror finish.
- Nos. 68 and 69. SILVER-STEEL, Perfection handle, Mirror finish.
- No. 64. SILVER NICKEL STEEL, London spring, Damaskeen finish.
- No. 52. SILVER-STEEL, Damaskeen ; made especially for pattern and bench work, to run without set.

We wish to call your particular attention to the Numbers 400 and 401 Hand, Rip and Panel Saws. These are unquestionably the Finest Saws ever made for the regular trade. Nothing has been spared that may add in any way to Quality of Material, Construction or Finish.

We also manufacture a full line of medium-priced Hand Saws, which are equal in quality to any Saws not branded "ATKINS."

## NUMBER OF POINTS PER INCH IN SAWS.

The following cuts are full size and represent number of points per inch in saws, also the various styles of teeth most commonly used. Care should be taken when ordering to specify points per inch, as there is one less tooth per inch than there are points.

4 Points per inch.  
(Rip.)

4½ Points per inch.  
(Rip.)

5 Points per inch.

5½ Points per inch.

6 Points per inch.

7 Points per inch.

8 Points per inch.

9 Points per inch.

10 Points per inch.

11 Points per inch.

12 Points per inch.

## ATKINS MANUAL TRAINING SCHOOL SAWS.

We make a specialty of equipping Manual Training Schools with Hand, Panel, Rip, Back, Mitre, Coping, Compass, Keyhole, in fact a complete line of Saws, for all purposes. We recommend particularly our High Grade SILVER-STEEL on account of its edge-holding qualities, and wish to call special attention to the scientific construction of our Saws.

We appreciate the necessity of supplying the younger generation with strictly High-Grade Tools, and our Manual Training Saws are made with this idea in view.

We show below two of the most popular patterns of Hand Saws, and should be pleased to correspond with any institution which is contemplating the installation of a new equipment.

This Saw is made of SILVER-STEEL, Skew Back, and the blade is ground on an actual taper from the tooth edge toward the point on the back (which is the thinnest part) so as to give clearance. Extra high damaskeened finish, Perfection Pattern Handle, made of apple-wood, carved and polished.

This Saw Blade is made of SILVER-STEEL, Skew Back, and taper ground, similar to the previous Saw, Damaskeened Finish, Apple Handle of different pattern from above.

## BACK SAWS.

Our special Manual Training School Back Saw is similar in style to our No. 2, shown on the following page, but is specially designed for Manual Training purposes.

Write for detailed information in regard to other types of Manual Training School Saws.

**ATKINS MITRE BOX SAWS.**

All above put up one-third dozen in a box.

## ATKINS PERFECTION GRASS HOOK.

The above specialty will be thoroughly appreciated by all users of Grass Hooks. The Hooks are meeting with an extra demand wherever shown.

The Blade is of Silver-Steel and will hold its edge much longer than the material usually placed in similar tools. It is extremely light and does not tire the wrist. Fitted with a hardwood, easy grip handle, securely fastened to a malleable casting by strong rivets. The curve of the blade is such that the entire cutting edge is constantly in use. Corners and out of the way spots may be easily reached.

**The handle being offset, saves the knuckles from becoming bruised.**

List price, per dozen, \$8.00.

## PATTERN MAKERS' SAW.

This Saw is designed for very fine smooth work. The Blade is  $7\frac{1}{2}$  inches long and there are 14 sharp, pointed teeth to the inch. The Handle is of sanded apple wood. Two brass screws.

Packed one in a box with label on top and end.

List price, per dozen, \$5.50.

**ATKINS STAIR BUILDERS' SAW.**

### SAW KNIFE.

Price, per dozen, \$6.00.

Saw Knives put up one dozen in a box.

## ATKINS BUTCHER SAW PUNCH.

The punching of necessary holes in Butcher Saw Blades has been the source of much annoyance to users of and dealers in this article. None of the better class of Butcher Saw Blades are punched when they leave the factory. There is so much variation in the styles of frames of apparently the same length that it would be impossible to do it and have them come out right. This little device suggested itself and came into existence because of the above condition. It is appreciated at sight.

The frame is of malleable iron, nickel-plated and polished. The screw and cross bar are of steel, handsomely finished. The die and punch are of the finest quality of tool steel, carefully tempered.

List Price, per dozen, \$9.00.

These Screws are put up one dozen assorted in small pasteboard boxes and one dozen of these packages are packed in a large carton.

We also put up two assortments of Screws in a most convenient and saleable form, as follows:—

ASSORTMENT No. 1 consists of a carton containing 36 small boxes, each box containing three only No. 1 and one only No. 10 Brass Saw Screws, and is adapted for the use of carpenters who want screws for Panel Saws and the cheaper grade of Hand Saws.

ASSORTMENT No. 2 consists of a carton containing 36 small boxes, each containing three only No. 2 and one only No. 20 Brass Saw Screws and is adapted for High-Grade Hand and Rip Saws.

ASSORTMENT No. 3. 3 No. 1, 3 No. 2, and one each 30, 31, 20, 10, 21, 11.

List Prices.

No. 1 assortment, each carton containing one gross assorted as above, (36 boxes)	\$4 00
No. 2 assortment, each carton containing one gross assorted as above, (36 boxes)	4 50
No. 3 assortment, each carton containing 12 boxes, (1 dozen in box)	4 00

## ATKINS LINE OF COPING SAWS.

### "JONES" CABLE COPING SAW No. 1.

Patented  
February 8, 1898.

Frame is heavily nickel plated, polished, buffed and fitted with hardwood handle; furnished complete with one-half dozen blades, packed in cardboard boxes. Frame carries 6-in. blade and is 4 in. deep from blade to back.

List price, per dozen, \$15.00.

Frames Nos. 1 and 7 are constructed with tubular back, through which runs a cable connecting both ends of frame, which causes the blade to turn to any angle by turning the handle only, without removing it from the work.

### "JONES" RATCHET COPING SAW No. 2.

Patented November 5, 1901.

Frame is heavily nickel plated, polished, buffed and fitted with hardwood handle; furnished complete with one-half dozen blades, packed in cardboard boxes. Frame carries a 6-inch blade and is 4 inches deep from blade to back.

List price, per dozen, \$9.00.

Frames Nos. 2 and 3 are constructed with a steel back and ratchet arrangement (see illustration) which enables the workman to set the blade at any angle by the handle and button at the other end of saw frame.

### "JONES" CABLE SCROLL SAW No. 7.

Patented February 8, 1898.

Special attention is called to construction of the grips or clamps for holding the saw blades; they are strongly made of steel and hardened; when properly tightened blade cannot slip. Frames are made to take 5-in. saw blade and are 10 in. deep from blade to back.

Frame is heavily nickel plated, polished, buffed and fitted with hardwood handle; furnished complete with blade and packed in cardboard boxes.

List price, per dozen, \$18.00.

Above put up one-sixth dozen in a box.

### "JONES" RATCHET SCROLL SAW No. 3.

Patented November 5, 1901.

Frame is heavily nickel plated, polished, buffed and fitted with hardwood handle; furnished complete with one-half dozen blades, packed in cardboard boxes. Frame carries a 6-inch blade and is 10 inches deep from blade to back.

List price, per dozen, \$10.00.

### "JONES" CABLE JEWELER SAW No. 6.

Patented  
February 8, 1898.

This frame is made to take a 5-inch saw blade, and is 3½ inches deep from blade to back.

Frame is nickel plated and fitted with hardwood handle; furnished complete with blade and packed in cardboard boxes.

List price, per dozen, \$15.00

## ATKINS COPING SAWS—Cont'd.

No. 6 .....per gross, \$1 00  
No. 7 .....per gross, 1 10  
No. 8 .....per gross, 1 20  
No. 9 .....per gross, 1 30

## JEWELERS' SAW BLADES FOR METAL WORK.

5-inch—Square Blade, for Nos. 6 and  
7 frames, per gross .....\$1 40

This blade is put up regularly with the No. 6 frame.  
Finer sizes furnished if desired at same price.

### SPECIAL JEWELERS' SAW BLADES.

For Metal Work.

5-inch—For Nos. 6 and 7 frames, per  
gross .....\$1 90

This is a very thin, flat blade for fine work on metals. Nos. 4 and 6 (narrower) and Nos. 10 and 11 (wider) at same price.

### SPECIAL HACK SAW BLADES.

For Metal Work.

¼-inch wide, 014-inch thick, 30 teeth per inch.

6-inch—For Nos. 1, 2 and 3 frames,  
per dozen .....\$0 75

5-inch—For Nos. 6 and 7 frames,  
per dozen ..... 70

By using these blades a large variety of metal work can be done with our Coping Saw Frames.

**ATKINS COPING SAWS.**

**Continued.**

**Coping Saw No. 50.**

This is a strictly High Grade Tool, sold at a moderate price.

The construction is strong, durable and its action perfect.

The back is  $\frac{3}{8}$  inches wide and  $\frac{3}{16}$  inches thick and made of cold rolled steel, nickered and buffed. Frame,  $7\frac{1}{4}$  inches by  $4\frac{5}{8}$  inches deep.

It is fastened to the handle by a malleable iron threaded ferrule, thus producing what is perhaps the strongest attachment for this purpose now in use.

All parts handsomely nickered and buffed.

The handle is of hardwood, easy grip pattern, carved and varnished.

Through the use of cap screws into which wires are inserted, the blade may be instantly adjusted to cut sharp or unusual angles with perfect ease and without strain on the blade.

While this Saw costs a trifle more than the ordinary Coping Saw, it is so much more satisfactory and durable that the mechanic who appreciates fine tools will prefer it to any other.

**No. 11. ADJUSTABLE TROWEL.**  
**Linville Pattern.**

The Blade is of Silver-Steel, the same as used in Atkins High Grade Saws.

The Bar A is fastened to the Blade by ten rivets and is beveled so as to hold a sliding Nut B, which is clamped to the bar by use of a hexagon Nut C, both of which are attached to the shank. By this device the handle may be moved along the bar so as to secure any desired balance, or may be entirely removed and folded in compact form for carrying in the bag.

The user is enabled to reverse the position of the blade and thus use either end, avoiding the wear on one end only, which the stationary handle involves.

By moving the handle it is possible for the user to reach into corners, back of radiators, or any unusual spot with ease, wherein through the use of the stationary handle it is impossible to do so.

The handle is of hardwood, ebony finish, easy grip pattern, rounded nose, non-turnable attachment and fastened with a hexagon nut.

Made from 22 to 26 gauge in thickness for plastering, finishing or browning.

Wrench for Hexagon nut supplied free with each trowel.

**Price List.**

B-28	28 x 5	13 75
B-30	30 x 5	14 00

“A” Style for 4-inch and “B” for 5-inch Saws.

## ATKINS COMBINATION CORNER BRACE.

Patented Oct. 10, 1905.

**A Tool Manufactured by us Exclusively Which Meets  
All Requirements.**

A combination of a Ratchet, Straight and Corner Brace, of the highest grade and the best finish. Highest polish and well nicked. Cocobolo head and handles. Ball bearing head. Holds any size of bits, and small size Round-shank Drill. As a Corner Brace it can be used where others will not go. It has no lost motion, has a positive drive, will work fast and drive the bit true at any angle, and with great power. It is particularly adapted for electricians, cabinet-makers and builders, and for rapid screw-driving.

Packed one-third dozen in metal edge boxes.

Made only in 10-inch size.

Weight, 36 pounds, complete.

**Price, \$48.00 Per Dozen.**

**ATKINS RATCHET BRACES.**

**Best Finish.  
Concealed Ratchet.  
Hardened  
Forged Steel  
Alligator Jaws.**

**Nickel Plated  
Cocobolo Head  
and Handle.  
Metal-Clad  
Ball-bearing  
Head.  
Heavy Steel  
Sweeps.**

**THE BEST BRACE MADE.**

Our Ratchet Braces above illustrated are first-class in every respect and fully guaranteed. The sweep, pawls, jaws and socket are of steel, well made, durable and rigid. Jaws are fitted with spring to keep them always ready for the bits, any size of which will easily fit this tool, as well as small sizes of round shank drills, holding them firmly.

1/2 DOZEN IN METAL-EDGED BOXES.

**ATKINS UNIVERSAL BREAST DRILL.**

In placing this tool before the mechanic it can be safely asserted that it has features that cannot be found in any other drill in the market.

This drill has a **CHAIN FEED ATTACHMENT** which is operated by the supporting handle, allowing pipes and similar articles to be drilled with perfect ease.

It can be **ADJUSTED TO ANY ANGLE**, making it indispensable for working between girders and ceiling joists and for such work has a **SCREW FEED**.

When limited space does not allow a full turn of the handle, the **RATCHET** can be used.

It has **TWO SPEED GEARS** which can be readily changed. The sweep of the handle is also adjustable.

From the features stated, it will be readily seen that this drill exceeds in usefulness any other drill heretofore brought before the mechanic, and is the most improved tool of its kind.

Machine-cut gears. Cocobolo handles. Adjustable crank. Nickel-plated chuck, fitted with forged steel alligator jaws, that will firmly hold both round and square shank drills. Double ball bearing socket. All well finished. Each tool is fitted with the special chain feed attachment, together with 4½ feet of strong chain.

The 3-jaw chuck will hold round shank drills from 0 to ½-inch.

Price, fitted with 2-jaw chuck..... each \$ 8 50  
 Price, fitted with 3-jaw chuck..... each 11 00

One each in metal-edged box; 2 dozen in cases. Approximate weight complete is 7½ lbs. each.

# Saw Makers' Tools and Saw Mill Specialties

To accomplish the best results a workman must have suitable tools, and mills should be equipped with the latest improved appliances.

Our practical experience and knowledge of the requirements of saw makers and wants of the mills enable us to furnish a line of Tools and Mill Specialties adapted to meet their wants.

We invite your attention to the following list of Tools and Mill Specialties:

## STANDARD WIRE GAUGES.

Small Gauges, Nos. 1 to 26 ..... Each, \$1 25  
 Round Wire Gauges ..... " 1 00

## IMPROVED SPEED INDICATOR.

Correct and reliable. This instrument is very useful for accurately giving the speed of any machine or shaft when in motion. It is very important that the exact speed of saws be given, and with the Speed Indicator there can be no mistake. Every mechanic should have one.

Sent by mail, prepaid, with cap, for \$0.75.

**ATKINS NEW IDEAL SWAGE.  
Nos. 0 and 1.**

As the result of years of experiment and experience, we are pleased to present Atkins New Ideal Saw Swage. This device overcomes all former difficulties and not only produces a perfect point ready for the shaper, but is of exceedingly simple construction and adjustment. It can be adjusted to swage any shape tooth by moving the block or body of the swage without changing the relation of the position of the block to the position of the die and anvil.

Makers of Swages have been striving to attain this feature for years. We have solved it first. The principle under which the New Improved Swage operates will be clear to you by referring to the X-Ray picture on page 212. Please note the few working parts which have been made strong and are re-inforced so as to prevent wear and breakage. From the standpoints of efficiency, durability and economy the Atkins Ideal Swage leads them all.

The Swage is handsomely nickel-plated and buffed, and will not rust easily. Duplicate parts may be secured at a nominal cost, (see page 212.)

**List Prices.**

No. 0	For Band Re-saws 17 gauge and thinner.....	\$37 50
No. 1	For Log Band Saws and Band Re-saws 14 to 17 gauge .....	37 50

## ATKINS NEW IDEAL SWAGE.

### Nos. 2, 3, 4, 5, 6 and 7.

**FOR CIRCULAR, SHINGLE, BAND AND GANG SAWS.**

The above Swage is similar to the New Ideal Nos. 0 and 1, but is designed for use on Circular Saws.

It is the result of years of experiment and experience and overcomes all difficulties which formerly existed, and while constructed along simple lines has the advantage of producing a perfect point ready for the shaper with the least possible adjustment.

It has the advantage of being adjusted to swage any shape tooth by simply moving the block or body of the swage without changing the relation of the position of the block to the position of the die and anvil.

This is a feature that has been attempted by all other swage manufacturers but has never been secured before.

The swage is handsomely nickel-plated and buffed, and duplicate parts may be secured at a nominal cost. (See page 212.)

#### List Prices.

**ATKINS IDEAL SWAGE.**

**WITH BENCH ATTACHMENT.**

For greater convenience, economy and the execution of more perfect work, we have fitted the Ideal Swage for Circular Saws shown on page 209, with a bench attachment.

The construction of same is shown very plainly in the above illustration.

It may be fastened to any ordinary work bench, and being equipped with a cone attachment will accommodate any size of hole.

In order to operate this Swage, it is merely necessary to move the supporting bar to the right or left until in the desired position, after which the Swage may be operated in the regular way by moving the Saw forward after each tooth is swaged.

This attachment assists in jointing the teeth uniformly, furnishes a convenient and economical attachment, and is much easier on the operator, enabling him to perform this operation with greater speed.

ATKINS NEW IDEAL SWAGE.

In putting the New Ideal Swage on the market we feel assured that we have at last reached the climax of swage perfection. The material and workmanship embodied in the New Ideal Swage are the best that money can buy, and along with the principles which have been brought out, not only by many years of saw manufacturing, but by the actual use in the mills, we know that the results can not be anything but the most satisfactory.

The principle of the New Ideal Swage is such that the working corner of the anvil is at the exact center of operation, so that when the point of the tooth is placed

exactly at the corner of the anvil and the block is rolled forward or back in the saddle, to accommodate a slender or blunt tooth, the relation of the point of the tooth to the anvil always remains the same, and in the same manner the relation of the die to the anvil remains the same, thereby allowing an easy adjustment to the most inexperienced operators.

N. B.—In ordering parts be sure to give the Number of Swage and the Letter indicating the part desired. Prices include postage when sent by mail.

**VICTOR SWAGE.**

**For Circular, Band, Gang, Mulay, Shingle, Lath, and Re-Saws.**

One of the most satisfactory Lever Swages made. Well known among mill men. Work unequalled. Satisfaction guaranteed.

Price of Victor Swage, any size, \$37.50.

We manufacture the Victor Swage in eight sizes for the various classes and gauges of saws, as follows:

- |   |  |
|---|--|
| No. 1, for Circular Saws 6 to 8 gauge.        | No. 6B, for Band and Gang Saws 14 to 16 gauge. |
| No. 2, for Circular Saws 8 to 10 gauge.       | No. 6C, for Circular Saws 14 to 16 gauge.      |
| No. 3, for Gang and Mulay Saws 9 to 13 gauge. | No. 7, for Band Saws 18 and 19 gauge.          |
| No. 4, for Circular Saws 10 to 13 gauge.      | No. 8, for Band Saws 19 gauge and thinner.     |
| No. 5, for Band and Gang Saws 16 to 18 gauge. |  |

In ordering give kind and gauge of saw. In ordering Dies give the number on the swage.  
 Extra Dies for Nos. 3, 4, 5, 6, 7 and 8..... Each, \$0 75  
 Extra Dies for Nos. 1 and 2..... " 1 00

**Two Dies go with Each Swage.**

These Dies are not interchangeable, but must always be ordered for corresponding number of Swage.

## THE PRIBNOW SWAGE.

The highest efficiency of this Eccentric Die Swage was reached by adopting a series of anvils and special shaped dies.

The anvil corners are scribed and numbered to agree with notches in the combination gauge (see description below) which affords absolute positive adjustments and quick change from one style of saw or shape of tooth to another. The dies are made in different styles best suited for the different classes of work. Other special features are: simple construction, which affords strength, durability, great speed and ease of operation.

They have passed the experimental stage and are endorsed by a number of the best filers as the most complete and perfect working tool on the market. Made in nine styles, suited for the different kinds of saws. Strength and workmanship guaranteed.

No. 1	For Circular Saws from 5 to 10 gauge, $\frac{3}{8}$ -inch die.....	\$54 00
	Price includes Wrench and Set Gauge only.	
No. 2	For Circular and Heavy Band Saws, 8 to 13 gauge, $\frac{1}{4}$ -inch die.....	57 00
	Price includes Wrench and Anvil Grinding Gauge.	
No. 3	For Circular and Heavy Band Saws, 10 to 14 gauge, $\frac{3}{8}$ -inch die .....	54 00

**THE PRIBNOW PATENT SWAGE SHAPER.**

**Nos. 1, 2 and 3.**

**No. 4.**

**Pribnow Shapers Do the Most Perfect Work of Any on the Market.**

The advantages to be obtained by the use of the Pribnow Shaper are obvious. It is the invention of an expert, and has the endorsement of experts and users of Circular, Gang and Band Saws everywhere.

**List Prices.**

No. 1	For Band and Gang Saws from 12 to 16 gauge .....	\$30 00
No. 2	For Re-Saw and Shingle Saws from 16 to 24 gauge .....	30 00
No. 3	Special, for Large Band Saws from 6 to 12 gauge .....	30 00
No. 4	For Circular Saws from 6 to 10 gauge .....	37 50

For Net List of Parts see page 219.

## THE NEW PRIBNOW IMPROVED PATENT SWAGE SHAPER.

**Nos. 5 and 6.**

This device contains all the best features of the Nos. 5 and 6 Shapers with a number of important advantages.

It has been thoroughly tested and is endorsed as a decided improvement by many expert filers.

Hereafter all orders for Nos. 5 and 6 Pribnow Shapers will be supplied with the new tool.

The New Tooth Gauge Holder will fit the Nos. 5 and 6 Shapers as they were formerly made. The Back Rest Bracket will also fit by drilling an extra hole in the block. Should you wish to avail yourself of this new device you may do so by ordering the new style Tooth Gauge Holder and Back Rest Bracket only and placing them on the old style Shaper as indicated above.

The advantages of the New Nos. 5 and 6 are as follows:

**FIRST**—The Tooth Gauge Holder straddles the Saw and guides the tooth gauge exactly over the tooth to be operated upon.

**SECOND**—The Tooth Gauge is long and rests on two teeth, making a positive guide for the tooth to enter the stop notch as the Shaper slides along the Saw.

**THIRD**—The Back Rest rests on two teeth, and can be instantly changed for use on either a Band or Circular Saw, or the Shaper can be tilted at different angles to suit the pitch of the teeth.

**FOURTH**—The Tooth Gauge Holder may be moved up or down to change the wearing face on its jaws without changing the gauge of the finished point. This is a valuable feature.

**FIFTH**—You will notice the Tooth Gauge can be used on both ends. Where it is convenient it will be best to specify the range of Saws by gauge so that the ends of the Tooth Gauge may be fitted to different gauge Saws.

The New Shaper is handsomely finished, nickel-plated, buffed and of the highest grade steel and best workmanship, fully up to the previous standard.

### List Prices.

## NEW IMPROVED PRIBNOW SWAGE SHAPER.

1909 Model.

The Jaw carriers are mounted in a positive chuck movement and are operated toward and from each other by a right and left hand screw, operated by one lever. The Jaws are independently adjusted on the carrier, thus enabling the operator to finish the points of the teeth on both sides with great precision. The Tooth Gauge Holder straddles the Saw and

keeps the tooth gauge exactly in line over the tooth being operated upon. A new wearing place on the jaws can be secured without changing gauge of finished point by simply adjusting tooth gauge holder up or down. The tooth gauge holder rests on two teeth, making a positive guide for tooth to enter stop notch. The shaper can be so tilted that the tooth gauge exactly fits point of tooth and the bevel on the shaping jaws comes in contact with swaged points in such a way (both jaws moving up alike) that tooth is pressed into perfect shape as in a mould. It is exactly even from both sides and is given at the same time that form which affords the most perfect clearance and economy of power and lumber.

The tooth gauge has a double end and can be fitted to suit a large range of Saws in gauge. It opens up like a book, see illustration to the left. Every screw and adjustment is in plain sight of the operator.

### List Prices.

No. 7	For Band or Cir. Saws from 5 to 13 ga., complete with wrench and grinding ga.	\$45 00

N. B.—In ordering Parts, be sure and specify the Number of the Shaper and also the Stock Number of the Part required. Above prices include postage when sent by mail.

**ATKINS GUMMERS.**

**ATKINS  
PERFECTION  
GUMMER.**

Price ..... \$40 00

Including Mandrel, Belt and  
12 x ½-in. Emery Wheel.

**ROMER'S  
PUNCH  
GUMMER No. 2**

For Cross-Cut Saws.  
(20 pounds.)

Price ..... \$12 00  
Extra Punches, net.. 1 50  
Extra Dies, net .... 1 50

**ATKINS  
PUNCH  
GUMMER.**

For Band and Cross-Cut  
Saws.

Price ..... \$27 00  
Extra Punches and  
Die, per set ..... 7 00

We furnish Dies for shearing  
Band Saws to be used in  
Atkins Gummer.

Price, per pair.....\$8 00

## ATKINS CYLINDER SAW GUMMER.

**Can be Used for Gumming any  
Kind of a Saw.**

This illustration shows the Atkins Cylinder Saw Gummer. This Gummer is adjustable, being so constructed that it can be raised or lowered, and the wheel can be used at any desired angle while the Gummer is in use.

Price, \$20.00.

Including Belt and Emery Wheel.

## ATKINS SHINGLE SAW SET GAUGE.

**For Cylinder, Shingle and  
Heading Saws.**

Nickel Plated, each, 75 cents.

## COUNTER SHAFT.

Arbor 24-inch long by  $1\frac{3}{16}$ -inch diameter.

Tight and loose pulleys  $4\frac{1}{2}$ -inch diameter by 3-inch face for 3-inch belt.

One two step cone pulley  $8\frac{1}{2}$  by  $7\frac{1}{2}$  with two faces for 2-inch belt.

List Price, \$10.00.

## THE "STANDARD" SAW GUMMER.

**WARRANTED.**

Has an automatic changeable self-feed, is very simple in construction, and beyond question a very complete and superior machine.

The "Standard" Saw Gummer complete, with three arbors, two cranks and wrench, with four solid cutters, any size on list, and one cutter grinder.

List, \$20.00.

The "Standard" Saw Gummer complete, with three arbors, two cranks and wrench, with two inserted tooth cutters, any size on list, and fifty teeth.

List, \$20.00.

## THE "I X L" SAW GUMMER.

**WARRANTED.**

Has a changeable self-feed, but is not automatic. It is pronounced first-class by those using it, and we sell it as such. It is designed especially as a low-priced Gummer; is strong and will do its work thoroughly.

The "I X L" Saw Gummer complete, with three arbors, two cranks and wrench, with three solid cutters, any size on list, and one cutter grinder.

List, \$15.00.

The "I X L" Saw Gummer complete, with three arbors, two cranks and wrench, with one inserted tooth cutter, any size on list, and fifty teeth.

List, \$15.00.

## MIXTER PATENT, CHAMPION GUMMER. WITH AUTOMATIC SELF-FEED.

**No. 1. Large Size.**

The engraving represents Mixer's Famous Champion Gummer, with patent adjustable Automatic Self-Feed. It can be regulated at will to feed faster or slower, according to the work to be performed, and can be changed in an instant from self-feeding to hand-feeding.

It is self-acting, throwing itself out of gear when the teeth are cut to the required depth, making them of uniform length.

The Champion has the lateral or oscillating movement of the cutter, and is fully adjustable to all kinds of saws, from the largest circular to the smallest in general use; also mill and cross-cut saws. The line of the teeth can be cut at any angle desired from horizontal to perpendicular. It cuts very rapidly, and with no risk of bending, breaking or case hardening the saw.

### Price List Mixer's Patent Champion Gummers.

No. 1. Patent Automatic Self-Feeding Gummer, including three cutters (usual size,  $\frac{3}{8}$ ,  $\frac{1}{2}$  and 1-in.) grinder and wrench. \$25 00  
Extra arbors for  $\frac{3}{8}$ ,  $\frac{1}{2}$  and  $\frac{3}{8}$ -inch cutter for No. 1 Champion Gummers, net... 2 00

## MIXTER PATENT, CHAMPION GUMMER. WITH AUTOMATIC SELF-FEED.

The engraving represents the Patent Self-Feed Champion Gummer in position to gum mill saws or cross-cut saws.

Especially adapted to cross-cut saws, and small and medium circular saws, etc. Shingle mills, planing mills, sash, door and blind factories, wagon and carriage, pattern and furniture shops, all need this gummer. It is also especially handy for lumbermen to carry in the woods for gumming cross-cut saws. It will soon pay its cost in saving of time and files.

The small size Champion has all the improvements and advantages of the large size Champion Automatic Self-Feed Gummer. Full directions sent with each Gummer.

No. 2 Mixer Patent Automatic Self-Feeding Champion Gummer, including three cutters  $\frac{3}{8}$ ,  $\frac{1}{2}$  and  $\frac{3}{8}$ -inch grinder and wrench.

Weight, boxed, 22 pounds.

**No. 2. Small Size.**

List Price, Mixer Patent, Champion Gummer, No. 2 .....\$25 00  
Extra arbor for  $\frac{3}{8}$ -inch cutter for No. 2 Champion Gummers, Net..... 1 50

**GUMMER CUTTERS.**

**Prices of Gummer Cutters.**

For Mixer's, Standard, I. X. L., Boss, Disston's XX and AAA Gummers. When ordering give make of Gummer.

Size, inches.....	$\frac{3}{8}$	$\frac{1}{2}$	$\frac{5}{8}$	$\frac{3}{4}$	$\frac{7}{8}$	1	$1\frac{1}{8}$	$1\frac{1}{4}$	$1\frac{1}{2}$	$1\frac{3}{4}$
Each .....	\$0 50	0 50	0 50	0 60	0 70	0 80	0 90	1 00	1 25	1 75

**STONE'S GUMMER CUTTERS.**

Size, inches.....	$\frac{3}{8}$	$\frac{1}{2}$	$\frac{5}{8}$	$\frac{3}{4}$	$\frac{7}{8}$	1
Each .....	\$0 50	0 50	0 75	1 00	1 25	1 50

**STAR GUMMER CUTTERS.**

Each .....	\$0 55	0 60	0 65

NOTE.—In ordering cutters, be sure and give size of hole, as well as size of cutter required, or you can send us an impression of one end of cutter on paper. Be particular to state what Gummer they are to be used in.

**IMPROVED CUTTER GRINDER.**

Price, \$1.00.

Grinds cutters perfectly round and true. We give a Grinder free with each Gummer.

## ATKINS EMERY WHEEL SAW GUMMERS.

### AA GUMMERS.

#### SPECIFICATIONS.

Diameter of pulley, 3 inches.  
 Face of pulley,  $2\frac{3}{8}$  inches.  
 Will carry wheel 10 inches in diameter,  $1\frac{1}{4}$ -inch face.

Price, each, \$8.00.

Emery Wheels extra.

### AAA GUMMERS.

Same pattern as AA, illustrated above. Larger and for heavier work.  
 Pulley diameter,  $3\frac{1}{4}$  inches; face,  $2\frac{1}{2}$  inches; carry wheel,  $14 \times 1\frac{1}{2}$  inches.  
 Price, AAA Gummers, each, \$12.00.

Emery Wheels extra.

## ATKINS DOUBLE END GRINDER.

Will carry two Wheels  $12 \times 1\frac{1}{2}$  inches or smaller. Equipped with tight and loose pulleys, two adjustable rests, babbitted bearings, and brass oil cups. (Note the four cap screws to each bearing.)

#### Specifications.

Weight, 65 pounds.  
 Height from base to center of arbor,  $8\frac{1}{2}$  in.  
 Distance between wheels,  $14\frac{3}{4}$  inches.  
 Length of bearings, 4 inches.  
 Length of arbor, 21 inches.  
 Diameter of arbor in bearings,  $1\frac{1}{8}$ -inch.  
 Diameter of arbor between collars, 1-inch.  
 Size of pulleys,  $3 \times 2\frac{1}{2}$  inches.

The above cut shows Grinder equipped with a  $12 \times 1\frac{1}{2}$ -inch square faced wheel for tool grinding on one end, and a  $12 \times \frac{3}{8}$ -inch wheel for saw gumming on the other end.

Price, each, \$12.50.

Emery Wheels extra.

## ATKINS GRINDERS—Continued.

Atkins Grinders are decidedly the best value. They are well built from the best materials. They are completely equipped with adjustable boxes, babbitted bearings, brass oil cups, suitable rests and pulleys.

### ATKINS No. 1 GRINDER.

For Jewelers, Dentists, Repair Shops, or any light grinding. Will carry two wheels 6x1-inch or smaller. A Taper Spindle can be instantly attached for Buffing and Polishing work. Adjustable babbitted bearings, nickel-plated spring cap oil cups.

**No. 1.**

Weight.....	10½ pounds
Height from Base to Center of Arbor.....	5½ inches
Distance between Wheels.....	6 inches
Length of Bearings.....	1⅞ inches
Length of Arbor.....	9½ inches
Diameter of Arbor in Bearings.....	⅞-inch
Diameter of Arbor between Flanges.....	½-inch
Size of Pulley.....	1¼x1½ inches

Taper Spindle, 50 cents additional.

For Saw Gumming, and Wood-working Plants. An exceptionally rigid, substantial machine. Will carry a 12x1¼-inch wheel or smaller. Adjustable rest, babbitted bearings, brass oil cups.

**No. 3.**

Weight.....	44½ pounds
Height from Base to Center of Arbor.....	9 inches
Length of Bearings.....	3 inches
Length of Arbor.....	14¾ inches
Diameter of Arbor in Bearings.....	1½ inches
Diameter of Arbor between Flanges.....	1-inch
Size of Pulley.....	3x2½ inches
Diameter of Base.....	12 inches

POINTS ON ORDERING WHEELS.

Always give us the following information plainly when ordering wheels, as this will enable us to intelligently fill your order and send that particular wheel and grade which will best meet your requirements.

1—Quantity required. 2—Diameter of Wheels. 3—Thickness of Wheels. 4—Size of Arbor Hole. 5—Coarseness, viz: Size of Grain. (See following page.) 6—Hardness, viz: Grade Letter. (See following page.) 7—Description of work Wheel is to perform. 8—Speed Wheel is to run, viz: Number of revolutions per minute of arbor on which Wheel is to run.

## ATKINS AAA CORUNDUM WHEELS.

### OUR GRADE LIST.

D—Extremely soft.	J—Medium soft	P—Medium hard
E	K	Q
F	L	R
G—Soft	Medium	S—Hard
H	N	T
I	O	U
		V—Extremely hard

The above is for the convenience of dealers, agents and those preferring to make their own grade selection. We strongly urge, however, that selection of grain and grade be left to us, when full information regarding the use of the Wheel can be given.

The intermediate letters between those designated as soft, medium soft, etc., indicates so many degrees harder or softer. That is to say L is one grade or degree softer than medium; O, two degrees harder than medium, but not quite medium hard.

### Suggestions for selecting Grain and Grade of Wheel.

Where the selection of the grain and grade is left to us, as recommended above, it is only necessary to give us fullest possible information regarding work to be performed and speed at which Wheel is to run.

When ordering Wheels for difficult or very particular work, send us, if possible, a stub or piece of Wheel that has given best satisfaction.

Kind of Work	No. of Corundum	Grade Letter
Castings, large iron and steel.....	12— 20.....	Q—R
Castings, small iron and steel.....	20— 30.....	O—P

## HUNTINGTON EMERY WHEEL DRESSER.

For turning, shaping, sharpening and removing glaze from solid emery wheels, running at full speed.

Price, Huntington Emery Wheel Dresser, each, 75 cents.

Cutters, per set, 15 cents.

## THE "KEYSTONE" CONNECTING LINK. Patented.

The Keystone Link is Drop Forged from Bar Steel and Forms the Strongest Link in the Chain. Imitations are made of Malleable Iron Castings and are Comparatively Worthless.

The Keystone Connecting Link for connecting new or repairing broken chains of any kind—is composed of two corresponding halves centrally pivoted on the same axis. As shown by the illustration herewith, the inner flat face of each member is pivoted with a projecting lug and recess, so that when closed and in use they mutually interlock, and by abutting against each other, lateral displacement of the two halves, and their consequent spreading or parting—is rendered impossible. The Keystone Link is drop forged from an especially tough grade of bar steel, is the only one so made, and must not be confused with similar devices which are simply malleable iron castings.

As everyone knows, "a chain is only as strong as its weakest link." You would not buy a malleable or cast iron chain—why then repair a wrought chain with a cast link, thereby definitely fixing its point of failure?

THEIR STRENGTH—They have been proven by numerous tests to be as strong as a solid welded chain link of corresponding size, and being made of steel in place of iron, they are in point of fact the strongest link of the chain in which they are used.

### Price List.

Size, inches.....	$\frac{1}{4}$	$\frac{5}{16}$	$\frac{3}{8}$	$\frac{7}{8}$	$\frac{1}{2}$	$\frac{5}{8}$	$\frac{3}{4}$	1

Sizes up to one-half inch packed one dozen in a box, or shipped in bulk if desired.

## ATKINS PATENT SIDE FILES.

**Adjustable No. 1.**

The No. 1 File is the simplest tool ever invented for the purpose. The width of the set or swaged tooth is regulated by a single set screw. The clamp for holding the file is adjustable, permitting the use of any kind of file, if one of our files made especially for them can not be easily obtained. This tool is especially adapted for Circular Saws.

**Adjustable No. 2.**

The No. 2 File is adjustable for holding any kind of file, similar to the No. 1, and by its shape is peculiarly adapted for long saws, such as Band and Gang Saws. It can be used on blades down to two inches in width, and as wide as desired. No one who runs such saws should be without this tool. It is also preferred by some on Circular Saws.

### Price

No. 1, for Circular Saws.....	Each, \$1 00
No. 2, for Band, Gang and Circular Saws .....	" 1 00
No. 3, for Band Saws.....	" 1 00
Extra Files for Nos. 1 and 2.....	Per dozen, 1 50
Extra Files for No. 3.....	" 2 00

Side Files are used for the purpose of regulating saw teeth after they have been set. It is impossible to set or upset a saw so that some of the teeth will not extend or be bent over a little more than others, and thus make rough lumber. By the use of these instruments all the teeth are made even; and a saw thus regulated will run twice as long without sharpening, and do much better work.

The reputation of our Adjustable Side Files is fully established, being acknowledged as most convenient and accurate tools. No. 2 is entirely novel in its construction and adaptability. It is easily operated, and insures accurate work.

## ATKINS PATENT SIDE FILE No. 3.

### FOR BAND AND GANG SAWS.

The No. 3 File is adjustable for holding 8-inch and 9-inch files, and so arranged that the file can be tilted to any desired angle. A gauge passes over the points of the teeth, bringing the file in proper position for doing the work. The No. 3 File is for all long saws. It can be used on any width of blade.

**Adjustable No. 3.**

**ATKINS BRAZING TABLES.**

**This Cut Represents Our No. 3 Table.**

These Brazing Tables have been designed from practical experience in our own factory and have proved to be most effective and satisfactory.

No. 1	Without legs, for brazing Band Saws up to 12 inches wide.....	\$37 50
No. 2	Without legs, is much heavier than our No. 1 and is suitable for brazing Band Saws up to 14 inches wide.....	45 00
No. 2x	Without legs, for Bands to 16 inches wide.....	56 25
No. 3	With legs, otherwise same as No. 2.....	56 75
No. 3x	With legs, otherwise same as No. 2x.....	67 50

**List Prices.**

No. 4	For Band Saws 9-inches in width and less.....	\$25 00
No. 5	For Band Saws 6-inches in width and less.....	18 75

**ATKINS BRAZING AND FILING CLAMPS FOR BRAZING NARROW BAND SAWS.**

**DIRECTIONS FOR BRAZING.**

Bevel the ends of saw about one-half inch, and bind firmly together with two or three strands of very fine wire. Fasten the saw in position with the set screws in clamp; place a small piece of silver solder on the lap, and cover with powdered borax. The braze can then be made either with our alcohol lamp with automatic blower, or with the common brazing tongs. Use the half circle of clamp when filing the bevel and in finishing up braze.

Price each, \$3.75.

**DIRECTIONS FOR USING LAMP.**

Use alcohol in both lamps and in the blower, having the blower about half full. Light both wicks in the lamps and place the heating lamp in position under the blower. See that the blow pipe is directed against the base of the blaze, and in a moment, as the alcohol becomes heated, the flame can be sent in any direction, and the weld quickly made. As the solder melts, spread it evenly over the surface of the saw with the point of a file.

Price each, \$4.50.

**BRAZING TONGS AND CLAMPS FOR BAND SAWS.**

To braze from 2 to 6-inch, with clamp..... Each, \$7 50  
 For bands 1½-inch and under, no clamp..... " 3 00

**SILVER SOLDER.**

The successful brazing of Band Saws largely depends on the solder used. We use, and keep constantly in stock, special Silver Solder that has proved to be the best adapted for brazing tempered steel.

We will furnish Silver Solder at the lowest market price, predicated on the price of silver.

## ATKINS PATENT COMBINED CIRCULAR SAW GUIDE AND ROUNDER.

### THE GUIDE.

This invention, used simply as a Saw Guide, has advantages which are possessed by no other guide. A glance at the accompanying engraving will make this fact apparent to every practical saw-mill man. Guide is adjustable and reversible. If the guide-pins *E* are set at a proper distance apart to admit the rotation of the saw, the adjustment is easily accomplished without danger to the operator while the saw is in motion. Loosen the set-screw *D* and turn the hand-wheel *A* in the direction required until the saw has the proper lead. Every sawyer will appreciate the practical value of this feature of our Guide, as the adjustment of Saw Guides—often necessary or desirable to change the lead of the saw—has heretofore been attended with more or less danger, or accomplished with considerable inconvenience and loss of time by the stoppage of the mill. Being reversible, our Guide may be used on a right or left-handed mill, or turned back to permit the removal of the saw from the arbor without displacing the Guide. Loosen the set-screw *D* and turn back the arms of the Guide, or reverse them as is desired. In the sleeve enclosing the shank of the Guide is inserted the set-screw *D*, which fits into a groove on either side of the shank, and which is employed to hold the arms of the Guide rigid when turned either to right or left, preventing them from turning over whenever the motion of the saw is reversed. When the Guide is in use the set-screw *D* should be set tight.

### THE ROUNDER.

The "ROUNDER" or "JOINTER" is entirely new and original, and its attachment to a Saw Guide a novel and valuable feature. When not in use detach the Rounder by using the thumb nut *F*. Saw teeth frequently require jointing, and no device has ever been constructed that will "round up" a circular saw so perfectly, effectually and conveniently as that we have now introduced in combination with our Saw Guide. Whenever it is desirable to joint the teeth of a saw, the emery block is brought into contact with the rapidly revolving saw by means of the hand wheel *C*, to which the emery block is attached. During the operation the attendant will turn the hand wheel *B*, thereby rotating the emery block so as to present a constantly changing surface for action on the saw teeth, and wear the face evenly. The saw is thus made perfectly round and all ready for dressing, and every tooth will do its proper duty. The saw will wear longer, cut more lumber and the lumber will be smoother.

ATKINS SWING SAWS.

No. 7.

We offer exceptional values in this line and particularly recommend our No. 7. The frame hangs on hangers, doing away with imperfect alignment and insuring the utmost rigidity. Cored hollow, giving maximum of strength with least weight..

The head is detachable, permitting of great ease in adjusting, and may be removed or re-babbitted. The Saw Arbor is of best spindled steel and runs in extra long babbitted and self-oiling boxes. Countershaft and hangers of  $1\frac{7}{8}$  steel shafting, have an up and down adjustment, equipped with belt shifter.

Through the use of adjustable counter weight, Saw may be made to hang at any angle. The Saw Guard will accommodate Saw up to 20 inches, or to 24 inches when so specified, at extra cost. Length of frame six feet, tight and loose pulley 8 x 5 inches, drive pulley 16 x 5 inches, arbor pulley 5 x 5½ inches, size of arbor in bearing  $1\frac{7}{8}$  inches, size of arbor where saw goes on  $1\frac{1}{8}$  inches. Speed of countershaft 450 revolutions per minute, weight of saw 400 pounds.

No. 7. List price with Saw.....\$50 00

No. 3. This Saw is similar to No. 7, excepting that the shaft is cast in one piece and is not detachable. List, complete with Saw..... 50 00

**WRIGHT'S  
NON-FRICTION BAND-SAW GUIDE.**

Price, \$10.00.

**WRIGHT'S BAND SAW SETTER.**

Accommodates Saws from  $\frac{1}{8}$  to 2 inches wide.

Price, \$20.00.

## EQUAL-BLOW SETTING MACHINE. FOR BAND SAW BLADES.

Sets an ordinary Saw in from three to five minutes.

Blades set without removing from machine, or at the bench as desired.

The first and only setting machine in which two teeth are set, one in either direction by two hammers which are pressed by same spring and striking with equal force at the same instant.

Price, \$20.00.

## ATKINS "AAA" CIRCULAR SAW SET.

The Atkins "AAA" Circular Saw Set is fastened to the bench or block by three common wood screws. It will accommodate 6 to 24-inch, either Rip or Cut-Off Saws.

The Saw is placed between cone-shaped holder, which is graduated for a hole from **three-fourths to one and one-half** inches. By the use of the thumb-screw the Saw is rendered rigid, but may be revolved on a bearing at the bottom of the cone.

The cone moves in slot to the proper point, and is held in position by thumb-screw on bottom.

The anvil has four surfaces of different degrees of bevel, and revolves into four slots, or stops, making it impossible to change the bevel after being adjusted.

The hammer is supported by spiral spring, and may be revolved in circular slide, and held in position by thumb-screw. This enables the user to secure any hook desired to point of tooth for either Rip or Cut-Off Saws. The hammer arrangement insures an equal blow. The Saw being held in uniform position, a variation in set cannot occur. The set of each tooth must of necessity be uniform. It is so simple that anyone may operate it.

List Price. each complete, \$8.00.

**THE HAMLET DIMENSION GAUGE.**

**Quick, Positive, Accurate.**

**Dimensions Lumber from one-eighth to nine inches.**

**Cut Represents Right-Hand Gauge.**

Price, \$10.00.

**THE O. K. SAW GUARD.**

**The Best Insurance against Accidents is to prevent them.**

A sure and reliable safeguard against accidents. Removes all danger from using small circular saws. Recommended by Factory Inspectors generally. In use in largest wood-working plants. Its principle is simply and fully demonstrated by this illustration.

Patented September 12, 1882; July 17, 1883; October 16, 1883; May 27, 1884.

- No. 1 Adjustable to any saw under 16 inches in diameter .....\$6 00
- No. 2 Adjustable to saws between 17 inches and 24 inches..... 7 00

## ATKINS CIRCULAR SAW MANDRELS.

### CAST STEEL. SELF-OILING BOXES.

**Pulley Outside Boxes.**

We fill all orders for Mandrels with pulley outside of boxes, unless otherwise ordered. Price does not include saw.

No.	Extreme Length, Inches.	Diameter of Arbor, Inches.	Diameter of Pulley, Inches.	Face of Pulley, Inches.	Diameter of Collars, Inches.	Size of Hole in Saw, Inches.	Size of Saw, Inches.	Price, Each.

### Larger Sizes Made to Order.

When ordering Saw Mandrels, send sketch and give distance from saw to end of Mandrel if the pulley is between the bearings. If the pulley is on the end of Mandrel, give distance from saw to inside edge of pulley. Also, whether the pulley is on the right or left-hand side of Mandrel when the saw is running toward you.

Our Mandrels are made with pulley on right-hand side, with left-hand thread, unless otherwise ordered.

## ATKINS MACHINE KNIVES.

### PLANER KNIVES.

**We are prepared to furnish you on short notice accurately ground Knives of the finest quality for any of the following purposes**

Back Lathe	Chair, or Back Lathe	Feed Cutter
Band Knife Jaws, or Guides	Chair Rounding	Flat Tennon Machine Cutter
Bark Mill (Holbrook) rough finish	Chamfer Cutters	Fodder
Bark Mill (Holbrook) planer knife finish	Cheese Box	Fur Cutting Bed (curved)
Bark Mill (Ott)	Chipper	Fur Cutting Bed (straight)
Bark Mill (Vaughn) rough finish	Chopper or Shears	Gaining Cutters
Bark Mill (Vaughn) planer knife finish	Clipper	Gauge Lathe
Barker	Clothes Pin	Gleason, Egan or Blanchard Spoke
Beader	Concaved or Convexed	Gouge Lathe
Bevel Edge Shaper Steel	Cope Cutters	Handle
Blanchard, Eagan or Gleason Spoke Lathe	Corrugated	Hay Cutting
Bobbin	Crossley Heading Jointer	Heading Jointer
Bookbinders' Shears made for Cast Iron Back	Crossley Sta <sup>1</sup> / <sub>2</sub> Jointer	Heading Planer
Caps (for stave knives)	Croze Bits	Hog Jointer
Chair Bottom	Curved Rag Cutter	Holbrook Bark Mill
Hoop Planer	Double Bevel Leather	Holmes Chamfer
Horn	Double Edged	Holmes Keg Chamfer
Howell Cutter	Double Cut, rounded	Hoop
Irregular Edge	Dyewood	Hoop Lapper
Jointer Bits (without slots)	Excelsior	Siding, Novelty or German
Jointer Bits (Crossley Stave)	Moulding Cutters	Single Bevel Leather
Jointer Bits (Heading)	Moulding Cutter Blanks	Solid Milled Matcher Bits
Jointer	Novely Siding	Special Knives
Double Edge	Ott Bark Mill	Spiral
Leather	Pail Handle	Spiral Tennon
Listing	Paper Cutter or Trimming	Spoke
Lithograph Stone Planer, with off-set or lip	Planer	Spoke Throatier
Lithograph Stone Planer, flat	Planer Head Bolts	Slate
Logwood Cutting	Plane Irons	Spur Bits
Matcher Cutting or Clipping	Plated all over one face	Stave
Matcher Bits (without slots)	Plated Stock	Stave Foot Jointer (listing)
Matcher Bits (solid milled)	Plow Bits	Stave Jointer
Meat Chopping	Rag Cutter	Stereotype
Milled Matcher Bits	Refuse Cutters	Stop Cutter
Milled Cutters	Repair Work	Straw Cutting
Mitre	Rounder	Tennon Machine Cutters (flat)
	Sash	Tennon Machine Cutters (spiral)
	Shaper Bits, or variety Cutters	Tobacco
	Shear Blades	Variety Cutters
	Shingle Jointer Ship Lap	Veneer
	Sheet Steel Shingle	Wheel Jointer Wood Chipper

**GUARANTEE.** We guarantee each knife to be absolutely free from imperfections as to material, temper, grinding, welding or finish, and guarantee the fit provided proper instructions have accompanied the order. Atkins Machine Knives are RIGHT in the first place and STAY right. This is the kind of insurance you want, and should appeal to every user of knives.

The fact that we are today the largest manufacturers of Machine Knives in the United States should be sufficient evidence of the merit of our goods.

**ORDER BLANKS.** We have specially prepared order blanks which we furnish free of charge and would be pleased to send you a supply. This is the safest way to avoid errors.

### PLANER HEAD BOLTS.

**Made from Forged Steel and Nuts are Case Hardened.**

We carry in stock most of the standard sizes. Any Pattern. U. S. Standard Thread. With or without nut and washer. Square and hexagon head made to order.

## LUMBER TRUCKS WITH STIRRUPS.

Set Consists of Two Axles and Four Wheels.

Wheels, Diameter, Inches.	Face, Inches.	Axle, Inches.	Track, Inches.	Price, Per Set.	Wheels, Diameter, Inches.	Face, Inches.	Axle, Inches.	Track, Inches.	Price, Per Set.
10	2 $\frac{3}{4}$	1 $\frac{1}{4}$	30	\$15 00	22	3	2	36	\$36 00
12	2 $\frac{3}{4}$	1 $\frac{1}{4}$	30	16 00	24	3	2	36	40 00
14	2 $\frac{3}{4}$	1 $\frac{1}{2}$	30	18 00	26	3	2	38	44 00
16	2 $\frac{3}{4}$	1 $\frac{1}{2}$	30	20 00	28	3	2	42	48 00
18	2 $\frac{3}{4}$	1 $\frac{1}{2}$	30	22 00	30	3	2	42	52 00
20	3	1 $\frac{1}{2}$	30	24 00					

## LOG TRUCKS, SIMILAR TO ABOVE, BUT HEAVIER PATTERN.

Set Consists of Two Axles and Four Wheels.

Diameter, Inches.	Face, Inches.	Axle, Inches.	Track, Inches.	Price, Per Set.
10	2 $\frac{3}{4}$	1 $\frac{1}{2}$	36	\$15 00
12	2 $\frac{3}{4}$	1 $\frac{3}{4}$	36	16 00
14	2 $\frac{3}{4}$	1 $\frac{3}{4}$	36	18 00
16	3	1 $\frac{3}{4}$	42	24 00

## EDGER WHEELS WITH AXLES AND STANDS OR BOXES.

**With Stands.**

Wheels, Diameter, Inches.	Face, Inches.	Axle, Inches.	Track, Inches.	List Price, One Axle and Two Wheels, with Stands or Boxes.
2	$\frac{5}{8}$	$\frac{5}{8}$	14	\$1 50
3	$\frac{5}{8}$	$\frac{3}{4}$	14	1 75
4	$\frac{5}{8}$	$\frac{7}{8}$	14	2 00

**With Boxes.**

A PAIR of Trucks or Edger Wheels consists of one axle and two wheels with stands or boxes.

A SET may be two or more pieces.

**Be Careful to Order  
by Pairs.**

**SAW-MILL CARRIAGE TRUCKS.**

A Set Consists of One Axle and Two Wheels.

Wheels, Diameter, Inches.	Axle, Inches.	Track, Inches.	Price Per Set With Patent Oil Boxes.
6	1 3/8	47 3/4	\$ 8 00
8	1 1/2	50	11 00
10	1 3/4	50	14 00
12	2	56	18 00

These wheels are turned and heavy, one wheel grooved and shrunk on axle, the other flat and loose on axle. Made with flanged wheels for "T" rails if desired.

**SAW-MILL CARRIAGE WHEELS WITH CHAIRS.**

- 5-inch diameter, one grooved, one flat ..... Per pair, \$3 00
- 7-inch diameter, one grooved, one flat ..... " 5 00

The 5-inch Wheels and Chairs have oil cellars, and the 7-inch have oil cellars and shoes.

**V TRACK.**

- V-track, 2-inch, price ..... Per foot, \$0 15
- Flat track, 2-inch, price ..... " 12
- Flat track, 1 1/4-inch, price ..... " 09

**FLAT TRACK.**

**T RAILS.**

Rails, 12, 16 and 20 pounds, furnished at lowest market prices.

**ATKINS "AAA" CAR MOVER.**

Here is a device which moves cars more rapidly and with less effort than has been possible through the use of any other hand contrivance. It is the invention of the patentee of a car mover which has heretofore been the most popular and is the result of lifelong study and experience. It is only a question of time when the "AAA" mover will supersede all others.

The reason for its ease of operation will be apparent when you examine the preceding picture. You will note that every pound of pressure is directed at the exact point where it will produce the best results.

The roller "F" permits the mover to slide easily along the rail. The hard steel Key "G" with four corners (which may be changed when desired) clinches the top of the rail and prevents slipping. The link "C" is fastened to the shoe "D" so that upon pressure on the handle, the shoe "D" is moved against the wheel with an upward and forward pressure and without any friction upon the car wheel whatever. The pivots "A" and "B" are the only points where friction occurs and as these parts may be easily lubricated, there is virtually no friction. The only pressure upon the car wheel is upward and forward rather than prying underneath the wheel as in the case of former car movers.

A trial of the Atkins "AAA" Car Mover in comparison with any other will immediately demonstrate its superiority.

This device will be of particular interest to every manufacturing plant which has switching facilities. It will enable one man to move the heaviest car from point to point and is the only hand contrivance that will do this easily and with speed.

The leverage is warranted to at least double that of any other car mover. It holds practically the same relation to other movers that they do to the old fashion "pinch bar."

Sold under an absolute guarantee subject to return in ten days if not perfectly satisfactory.

Price each, \$5.00.

**List of Parts for "AAA" Car Mover.**

LETTER AND NAME OF PARTS.	Price, Each.	NAME OF PARTS.	Price, Each.
G Frame .....	\$1 75	Lever .....	\$2 75
D Wheel Shoe .....	50	Short Pin .....	08
E Steel Grip .....	25	Long Pin .....	15
F Roller Wheel .....	25	Wood Handle .....	12
C Link .....	15	.....	.....
A Lever Bolt .....	04	.....	.....

## ROGERS BELT AND STRAP PUNCH.

**Fits the Pocket.**

This punch is easily sharpened if it ever gets dull. When not in use the punch is drawn back into the handle which protects it. Will cut any size hole from  $\frac{1}{8}$  to  $\frac{3}{8}$ -inch, in canvass, rubber, or the heaviest double leather, oak tanned belting with perfect ease. Should be in the pocket of every Engineer, Farmer and Horseman. Should be in every kit of tools.

Per dozen, \$9.00.

## THE GOODYEAR PATENT LOAD BINDER.

The Goodyear Load Binder is unsurpassed for binding logs, hay, lumber, pipe, or large loads of every description. The Binder when open has a spread of  $22\frac{1}{2}$  inches and closes up 18 inches, taking up a slack of  $4\frac{1}{2}$  inches. Weight only 21 pounds per pair.

Price each, \$2.50.

## KWIK-KUT HACK SAW MACHINE.

### A POWER HACK SAW MACHINE

Including **ALL** the Good Features of Former Machines with Many New Ones Added and Sold at the Same Price.

- BUILT** ..... On strong mechanical lines—all wearing parts large and durable.
- KWIK-KUT** ..... Because the ENTIRE blade is used from end to end. The only machine embracing this feature.
- KWIK-KUT** ..... Because the machine automatically adjusts its stroke to all sizes of cuts.
- KWIK-KUT** ..... Because of the rapid "shot gun" return of the saw arm. The blade has a regular forward motion but returns **THREE TIMES AS FAST**. Thus saving the time consumed by other machines which move forward and backward at the same speed. Ten strokes per minute more than any other machine without injury to blade.
- AUTOMATIC** ..... Equipped with automatic attachment which throws clutch and stops machine as soon as cut is made.
- FLAT GUIDE**..... On which the saw frame is mounted (with babbitted bearings) insures durability and a straight cut and prevents breaking saw blades.
- THE FRAME**..... May be thrown back, if desired, leaving the vise absolutely clear.
- HAND POWER** ... May be used if desired.
- SPLIT FINGER**.... Holds saw blade in perfect alignment.
- FRICTION WHEEL**. Clutch adopted by us is the only efficient means of applying power and has never been used on Hack Saw Machines.
- WISE**..... Equipped with right and left handed screw; holds work firmly.
- RIGIDITY**..... Absolutely free from vibration, the KWIK-KUT makes a smooth, square cut, saving the necessity of filing, planing or smoothing.
- SIMPLICITY**..... The simplest and most easily adjusted machine made.

#### Made in Three Sizes, as Follows:

	Capacity.	Length Blade.	Size Pulley.	Speed.	Floor Space.	Weight.	Price.
No. 1.	4 x 4 inches	12 inches	12 x 2¼ inches	60	34 x 17	150 lbs.	\$37 50
No. 2.	5 x 5 inches	14 inches	14 x 2½ inches	50	36 x 17	180 lbs.	45 00
No. 3.	8 x 8 inches	17 inches	17 x 3 inches	45	39 x 17	250 lbs.	60 00

This Machine, used in connection with ATKINS AAA HACK SAW BLADES, will prove a strong combination, giving the user most gratifying results.

## BABBITT METAL.

### ATKINS SUPER-EXTRA.

The best bearing metal that can be produced and especially recommended for places where the most severe service is required.

### ATKINS PERFECTION.

Strictly high grade and guaranteed satisfactory.

### ATKINS ANTI-FRICTION.

A good metal, recommended and fully warranted for any ordinary requirements.

Prices of Babbitt Metal quoted on application.

The above grades are guaranteed equal to any metals on the market sold under corresponding numbers.

All metals packed in boxes approximating 50 pounds.

## THE ROCHESTER AND CLIPPER WOOD SAWS.

Made to Carry Saws 20-Inch to 30-Inch Diameter.

**THE FRAME** is a combination of iron and wood, consisting of iron piping with collars on each end and long bolts which extend through the pipes and wood, making it much stiffer and stronger than any mortise and tenon frame, and one that can always be kept rigid by tightening up the bolts; and any person can easily duplicate the wood work as it wears or rots away.

**FINISH.** They are all painted vermillion, varnished and nicely finished.

**COVER.** The back part of the saw is not covered, it being unnecessary, as the shield is placed below to protect the person throwing away the wood and to prevent the wood from falling against the saw, which is the cause of many blades breaking.

**TABLE.** The saw tables are smooth and solid, making it very easy to slide the pole or logs along quickly without the delay of lifting, as with an open table.

**BRACING.** The machine may be braced underneath the boxes when sawing and staked around the legs in the usual way.

**MOVING.** It will fit in an ordinary wagon box, hence is handy to move.

**SPRINGS.** They have steel coil springs to throw the table back and a hook to fasten it up out of the way when moving.

**LOGS AND POLES** are cut square through on this machine. They can be fed from either side. Also there is a casting extending beyond the saw to hold up logs and poles, making it the most complete, quickest and easiest tilting table saw to operate.

**DOUBLE PULLEYS.** There are two flange pulleys on the mandrel. A short belt goes on the inside one to the fly wheel pulley and the drive belt on the outer one. That gives 12 inches of belt surface to carry the saw through a cut.

**BELT TIGHTENER.** The short belt can be tightened while running by turning screw above the box by the fly wheel.

**THE MANDREL** is Bessemer steel, 1½-inch in diameter, has large hexagon nut to avoid being broken off in cold weather. Also has adjustable collar to take up end thrusts.

**THE BOXES** are lined with good babbitt metal and take up for wear.

**PULLEYS** are 6 x 6 inches.

**FLY WHEEL** in proportion to size of machine.

**NET WEIGHT** from 60 lbs. to 440 lbs.

**PRICES,** from \$17.50 to \$34.50, without blades.

Hammer and bar swage .....	207	Metal saws, circular .....	33
Hand saws .....	146-168	Metal cutting nest .....	174
Hand hack saws .....	67	Mill saws .....	55-56
Handy carpenters saw .....	171	Milling saws, circular .....	33
Handy tool .....	189	Mitre boxes .....	170
Hand saw filer .....	130	Mitre box saws .....	169
Handles, cross-cut .....	107-112	Mitre saws, circular .....	30
Handles, hand saw .....	183	Mixer gummers .....	224
Handles, small saw .....	183	Mover, car .....	249
Heading cutters .....	32	Mulay saws .....	56
Heading saws .....	28	Nail cutting saw .....	174
Hedge knives .....	194	Narrow band saws .....	50
High speed steel saws .....	36	Narrow cross-cut saws .....	68-69
Higley circular milling saws .....	35	Nest of saws .....	174
Hollow back cross-cut saws .....	68-89	O. K. saw guard .....	239
Hollow back ice saws .....	64	One-man cross-cut saws .....	90-92
Hollow ground circular saws .....	36	Panel saws .....	146-169
Huntington emery wheel dresser .....	231	Pattern makers' saws .....	197
Huther dado head .....	61-62	Perfect saw set .....	129-130
Ice saws .....	64	Perfection scrapers .....	188
Ideal swages .....	209-212	Pit saws .....	57
Indicator, speed .....	205	Plastering trowels .....	190-193
Indiana hack saw frames .....	70	Planer head bolts .....	246
Inserted tooth saws .....	40-46	Planer knives .....	246
Inserted tooth wrenches .....	47	Plumbers saw .....	174-176
Interchangeable compass saws .....	173	Pond ice saws .....	64
I X L gummer .....	223	Pork packers saw .....	180
Jewelers saw .....	69	Power hack saws .....	68
Jewelers coping saw blades .....	69	Pribnow swage .....	214
Jewelers coping frames .....	185	Pribnow swage shaper .....	217-220
Jones coping saw .....	185	Pruning saws .....	174-176

## INDEX—Continued.

	Page.		Page.
Punch, butcher saw .....	182	Square, siding and try .....	196
Punch gummer .....	221	Stair builders' saw .....	171
Pusher, car .....	249	Standard gummer .....	223
Rails .....	248	Stave saws, barrel .....	61
Rail hack saws .....	71	Straight edge .....	206
Raker swage .....	128	Strap punch .....	250
Raker gauge .....	127	Swage, raker .....	128
Rasps .....	244-245	Swages, Ideal .....	209-212
Ratchet brace .....	199-202	Swages, band and circular saw .....	209-215
Ratchet coping saws .....	185	Swage, Pribnow .....	214
Refitting burned saws .....	60	Swage shapers, Pribnow .....	217-220
Retempering burned saws .....	60	Swage, Victor .....	211
Repairing saws .....	58-60	Swage, upset .....	208
Repairing burned saws .....	60	Swages, bench .....	211
Re-saws .....	25	Swing saws .....	235
Resteeling bilge saws .....	61	Table, brazing .....	233
Rift saws, chisel tooth .....	47	Table, leveling .....	206
Rift saws, gang .....	54	Tapered pruning saws .....	176
Rip saws .....	146-168	Tempering saws .....	60
Rochester & Clipper wood saw mach.	253	Testers, flour .....	196
Rogers belt punch .....	250	Tillers for pit saws .....	57
Romer's punch gummer .....	221	Tongs, brazing .....	234
Rounder .....	235	Tongs, cross-cut saw .....	113-123
Rubber bands .....	50	Tooth gauge .....	127
Saw knife .....	181	Top saws .....	25
Saw screws .....	184	Training saws, manual .....	168
Saw sets .....	124-126	Track .....	248
Saw clamp .....	133	Trowels, plastering .....	190-192
Saw vise .....	131-133	Trowels, cement .....	191-193
Saw tools .....	113-123	Trowels, finishing .....	190-192
Segment veneer saws .....	29	Trucks, lumber, log, etc .....	247
Setting hammer .....	124	Trucks, saw mill carriage .....	248
Scrapers, floor and cabinet .....	188	Upset swages .....	208
Scrapers, bench, belt and wall .....	189	Veneer saws .....	29
Screws, saw .....	184	Victor swage .....	213
Screw slotting saws .....	69	Vise, hand saw .....	131-133
Scroll saws .....	185	Vise, circular saw .....	238
Scroll saw blades, Fay .....	65	Wabble saws .....	32
Sets, mill saw .....	207	Wall scrapers .....	189
Sets, shingle saw .....	207	Webs, Felloe .....	65
Setters, Wright's band saw .....	237	Webs, German .....	65
Shingle saws .....	28	Wheels, Corundum .....	228-230
Shingle saw set gauge .....	222	Wheels for lumber trucks .....	247
Side file .....	232	Whip saws .....	57
Siding saws .....	25	Wide band saws .....	49
Siding and try square .....	196	Wire gauges .....	205
Silver solder .....	234	Wood saws .....	134-145
Solder, silver .....	234	Wood saw blades .....	144
Slate saws, hack .....	69	Wood saw frames .....	143
Slate saws, circular .....	37	Wood saw machine .....	253
Solid tooth circular .....	24	Wrenches, inserted tooth .....	47
Speed indicator .....	205	Wright's band saw setter .....	237
